Hello John DeStefano,

I acknowledge receipt of your letter. Your letter was dated June 6<sup>th</sup>, 2017. I received your letter on June 16<sup>th</sup>, 2017. I was pleased with your letter.

You can keep me in your considerations for a relevant professional position with the current administration. Considering the possibilities and necessities is appropriate for something realistic and successful in these directions. I likewise will keep the considerations open.

For added points of interest, I will say that I truly have a quarter-century of accomplishments and potential relevant to this country and U.S. citizens. In addition, in the present years, I am professionally licensed in all 50 U.S. states and the District of Columbia—Washington, D.C., and that licensing can be turned into a different kind of licensing relevant to professional work requiring concerning the United States. On my levels, I talk to people throughout the country every day, even right now and which I am continuing, but which I am also saying could be done in another way. The same is so with working directly and remotely.

There is plenty of potential. Nothing instant is expected, and with honorability in all directions, adequate notice is needed for making any involved accommodations.

Thank you for your acknowledgment letter dated June 6<sup>th</sup>, 2017. Your letter is duly noted. You can communicate further with me any time you would like, and of course, the fastest way is by email using my stated email address.

Joseph Mallon

Subject: Letter received

Hello John DeStefano,

*To the White House and Current Administration*

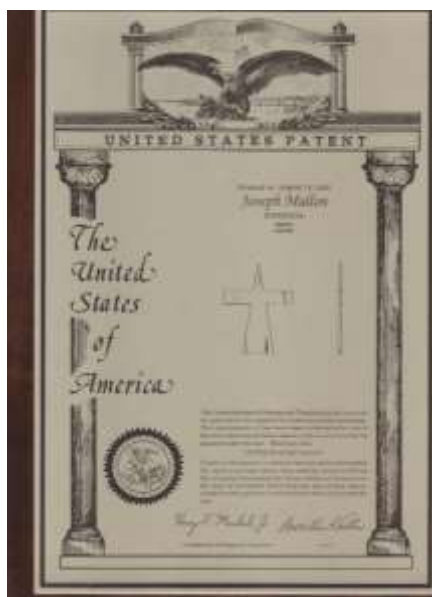

*Happy Fourth of July*

*Independence Day*

This holiday, the Fourth of July—Independence Day, stands for freedom and the independence of this country, the United States of America.

Freedom is one of the foundational policies of this country. Freedom is said to be built into the U.S. Constitution. Freedom is one of the most important ideals that this country stands for and supports. This country is a free country, has free enterprise, and is the land of free people.

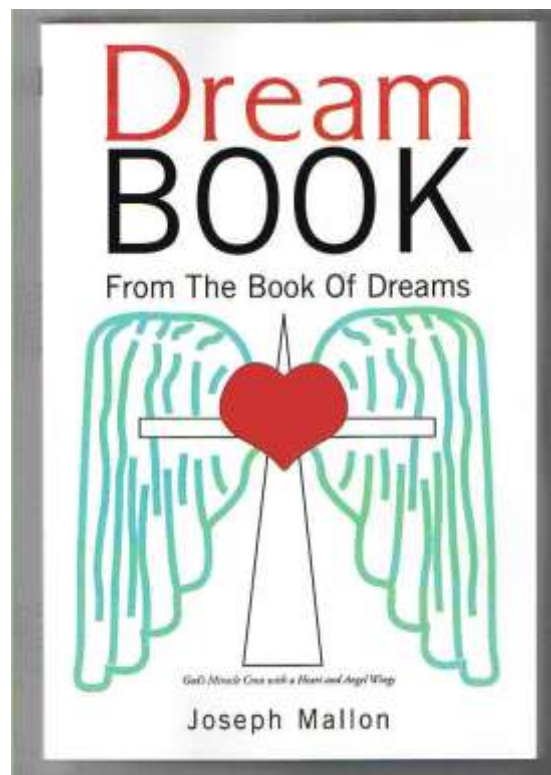

I have known, expressed, and supported these freedom aspects of this country and Independence Day since many years ago when I first communicated to the White House in 1983 as Ronald Reagan was there. This official communication to the White House was following my discovery in 1981 of an authentic miracle in this country and referred to as *God's Miracle Cross*. I am the *discoverer* of *God's Miracle Cross*.

American freedom continued with me through the years and Independence Days to in the George H.W. Bush times as I remained notifying the White House of the status of the active national issues.

I did much more through the next years of Independence Days and freedom in America. All through the years of the 1990s and first decade of the 2000s, I did well and remained successful but was still not ever truly dealt with.

To add in here an important point relevant and worthy, I am remaining open for any kind of professional employment/business package to be presented to me to look over. I would respond efficiently.

Enjoy the liberty of having a happy Independence Day of 2017 in celebration of freedom and the independence of this country, U.S.A.

Subject: Happy Fourth of July

Hello John DeStefano,

### **Application Materials for Official Position, Director**

As is obvious, the professional position involved with me here is more than usual. I am accordingly presenting some more than usual facts and merits involving me. I have to present them so that you can, would, and know to deal with me concerning the professional position involved, Director. You would not, and would not have justification to, deal with me so honorably if there were not such significant facts and merits involving me. I was honest and open with what I present here, so a matching up to the substantial and honorable levels is appropriate and necessary involving the professional position and its presentation to me.

The professional position package must include a declaration of job honor. The honor aspect is because even before the start, the position is understood instantly as being more than usual and one that is primarily based on high degrees of honorability. The honor aspects have to be respected and kept secure. No parts of the job can be insulting or degrading. Space for job autonomy, discretionary decisions, and personal style and expertise has to be included and maintained.

I cannot be fired. Once hired, there can be no firing of me. There certainly will be no just cause to fire me, anyway, but also, the job calls for no unjust, arbitrary, or attitudinal firing of me. In other words, there can be no firing of me from the professional position given to me as an honor. I cannot be fired, terminated from employment, told to leave, pressured to resign, or anything of this kind. Anything and everything has to be mutually worked out with me.

There can be no negative critiquing or unagreed-with limitations of resources deemed appropriate. No one can have broad-sweeping authority over everyone else and without adequate mutuality, and myself, and each official, representative, and agent, has to have freedom, autonomy, and rights, to personal space while working. At the same time, each person has responsibility to maintain appropriateness and ethics. I myself have worked through many years before I was rewarded and honored as I should have been, and I am well-proven and very advanced, so I earned the honor and respect due me. A part of my professional position benefits has to include honor due me and shown to me in ways such as job freedom, autonomy, security, status, and tranquility.

There can be no quotas I have to meet. No standardized expectations can be set, and no time constraints are acceptable. No mechanical, automated, or technology systems are allowed to be uncontrollable and not subject to overriding, stopping, slowing, or altering. Any quantitative illustration will be subject to a qualitative evaluation, and the same goes for the other way around. Quotas, statistics, polls, surveys, and rates can only be used as guidelines but may not be used strictly or as static, rigid, or effectually measurable in any negative way.

For adding in additional information to follow-up on previous communication, I am including material relevant to the doctoral program. I explained how I earned my doctorate by in 2012 after 5 years but was wrongfully and unjustifiably not issued my doctorate through the following 5 years, amounting to 10 years in a 3-year program. I am now further backing my emphasis by including a link – <https://youtu.be/6KPd7P9HUPc> or <https://www.youtube.com/watch?v=6KPd7P9HUPc&feature=youtu.be> – to a recording of chapter 5 of my dissertation (which is made accessible from now to through the month of December 2017). I present the material as a top-quality work and further expressing what I have been saying about, and I do not present the dissertation material for any other purpose and especially for any lessening, degrading, or contrasting. I do specifically request that only reviewing my chapter 5 with proper intent be done because not only do I want my doctorate that I earned by in 2012, but I also want my U.S. Government director job and my past 10 years of honorable work to be treated right.

Being that there has been so much trouble with education, the area needs evaluations and balances. Education is something that is important and good, but it is also something that can be abused and misused. I went through many years with good credentials and without them being effectually honored in business. I became very advanced in education itself, in addition to business, and went through more than 5 years without receiving respect or honor due in education and also without receiving my doctorate I earned through the previous 5 years. Everyone else was definitely not treated like that, although many people were not treated right, and there was no adequately functional policy for fairness in those years concerning education.

In addition, the student loans issue was never truly taken care of because being regarded enough or along with the education is necessary to honor the person to points of the person being able to afford to pay the student loans back. Young people should not be caused to be in excessive debt. Student loans alone should not be needed, especially when the person has much potential, and realistic scholarships and grants should be predominant for the funding. Extensive evidence indicates that something has to and should be done about the student loans situation in this country. On every front, education in this country does not get a green light or a passing grade, and work on the issues involved requires.

I expressed about some specific and general areas involving education. Education should not be let to be ruined for the country or anyone of this country. Education should not be misguided to serving altered, inappropriate purposes of belittling people, contrasting people, blocking or burdening people, undermining or devaluing people, or skewing people or their characters or perspectives. Education is to teach and enlighten and is not to brainwash and degrade. In my director position, I have to be honored as an advanced master in my field and one who is a doctor, an expert, and an authority and who is not inferior or subservient in any of these ways. In and concerning my directorship position with the United States Government, no educational courses of any kind can be required and have to only be freely voluntary and kept open, such as to honor my completed dissertation and doctoral and post-doctoral work, for

achieving further accomplishments, developing, and credentialing to advance in one's career and life. In addition, all my student loans from past to present must be totally eliminated in terms such as bestowing a student loans relinquishment honor to me for my past more than a quarter-century (25 years) of work relevant to and important concerning the United States.

I considered that my formal application and resume should be included. I attached them. My United States application materials present through the past 10 years can also be accessed on usajobs.gov → <https://www.usajobs.gov/Applicant/ProfileDashboard/Resumes/>. The material goes through the past 10 years. Material remaining worthy and successful through 10 years before being recognized should be correctly understood and treated right. I present the material here, and I reiterate and back every expression made in the material.

You will see some substantial facts expressed in the material. These substantial facts are mentioned so that they can be understood as already having been involved and worthy for honorable progress in all ways and including with the professional position. Expressed about are merits and worthiness that are among the most there can be and as much as expressions can emphasize. Boasting or exaggerating is not intended, and all that is intended is to say and have the mentioned aspects enabled to receive enough honorable attention to result in a foundation laid for the advanced professional position involved.

The fact that the application materials are from 10 years ago has to be remembered. Appropriately dealing professionally with me is a quarter-century involved and requiring. The situation is not just usual and is not the same as everyone else's situation. Interference or distortion in any way cannot be let to happen intentionally or unintentionally. If the United States Government is going to be honorable and honor me by giving me my directorship position, then that has to be done for real and with all being perceivable by any reasonable person.

Subject: Month of November 2017 - worthiness for securing professional position

Joseph Mallon, DBA-c

April 8-30 to June 10, 2017

I am applying for this United States Government Director level position because of the appropriateness for me to apply. I have most, if not all, of the exact qualifications sought for the job, and my qualifications meet and exceed the job requirements. I have exact credentials and equivalent credentials that are equal to, if not more than, any others. I would be excellent for the professional position and would do an excellent job, so because of the mutual benefit and appropriateness for me to apply for this Director level position, I submitted my application.

I will say also that I do have extensive experience in my many areas of expertise. I would have to be given this job in order for me to have it. I mean that the job would have to be rewarded to me, or I would have to be honored with this job because of my earnings, merits, and potential. My qualifications either stand out exceedingly, or the perspectives will not notice my superior credentials for the job.

I would be willing to take on this job. I am currently looking around and am open to some possibilities, such as this one. I seek working in a leadership capacity as I am qualified for and have earned through the past years. An encouraging opportunity would only have to be provided to me.

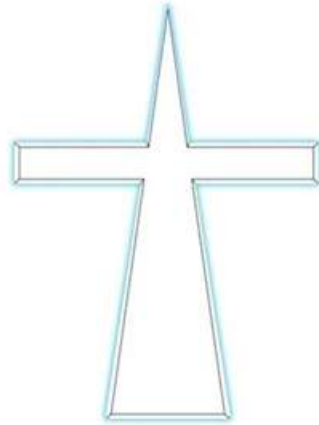

I would start working immediately but from my home state of Pennsylvania. I would not immediately relocate from Pennsylvania, and I would work primarily from Pennsylvania. I would immediately work remotely also, which means I can immediately connect with anywhere, including Washington, D.C. I would be open to some travel at the right times and to the right places. My starting work location, though, would have to be Pennsylvania, although I could be fully set up to work out of Washington, D.C., too, when considering working remotely, which is immediately possible.

I applied for appropriate level professional positions with the United States Government since more than 10 years ago. I went in other various directions in the years and remained highly successful when there was nothing worked out on the part of the United States. I am applying again here since the situation still is best for all involved that I work in a right job capacity with the United States.

Please just communicate to me in some way, such as email, if wanting to commence with this United States Government Director level job sometime soon or immediately.

Thank you,

Joseph Mallon, DBA-c

Joseph Mallon, DBA-c, FLMI, FFSI

Philadelphia, PA, USA

April 8-30 to June 10, 2017

Trump and Associates (and Republican National Committee),

I sent this letter relevant to the top priority issues requiring most in these times. Everything in this letter is valid and active, in addition to being worthy and meritorious. The only way this country will be going in right ways is if these materials are worked with appropriately and my official professional position is worked out. I am qualified for many jobs, and all that is needed is one of them that is a right one. For example, I recently applied for Vacancy Announcement: 2017-284AA - Position Title: **Director, Office of International Monetary Policy**, but my application was again, after almost 10 more years, mistreated and hastily rejected very vaguely and inaccurately. Those people did not deal with any of the aspects involved, and a remaining issue is how and when am I going to have the job I should have on the dignitary levels worthy and necessary involving me and mutually agreeable with me.

I would have been the best in the mentioned position, and the job done would have been excellence. All would have been as ideal as could be on my part and concerning all involved with the job, including in the best interests of the United States. I would have started immediately working from Pennsylvania, where my headquarters would have remained for at least the next few years. My true background showed my true status of being a *Very Important Person (VIP)* who has been requiring to be dealt with concerning the United States through the past more than 30 years. Anyone here involved with professional positions concerning the United States can be successful only if dealing with the right person, such as **me**, concerning a right level job, such as this one, **Director, Office of International Monetary Policy**, but a vague rejection cannot be presented instead of an offer that is supposed to be presented.

These interests include in terms of security because there will only be a full level of national and global security if these areas are included honorably. Certainly, security is not all that is included, but safety of America and the American people is included here, along with all other areas of this country, U.S.A.

*Plenty of Good History*

*Many Years of Specialized Skills and Experience*

*Formally Recognized Credentials*

*Advanced Designations*

*Worthy Merits*

*Essentially Important Relevancy*

*Extensive Potential*

*Insurance Licensed in all 50 states and the District of Columbia*

*LOMA designations of FLMI and FFSI and others*

*American*

*Natural Born U.S. Citizen*

*Native Continental United States residency – after multiple generations*

*MBA degree received*

*DBA-c – Doctoral Candidate in business*

*Years of communication to the Republican Party / Republican National Committee*

*...1993-2017*

*Maintained success, accuracy, and potential*

*Societal wealth preserved*

*Years of work, knowledge, experience, and potential*

*Plus more...*

**Party side:** Republican

**Communicated to:** Communication line for Trump (Donald) and Republican National Committee

**Communication:** As communicated

**Time duration:** Since previous communication to now and continuing (see time stamps)

**Years experience, credentials, expertise, and authority:** More than 30

**Potential:** Tremendous and more than anyone else in or of the United States or on Earth

**Notifications:** All will remain successful, advanced, active, and balanced concerning any way gone

**Advisory:** All here and involved with this emphasis is true and real, long-enduring, and contains much between the lines

**Skills:** Can best handle any and all issues and produce optimal results in short- and long-term

**Requirements:** Appropriate level professional job package

**Additional:** Resume available upon request

-/\-

Joseph Mallon, DBA-c, FLMI, FFSI

## 1. Vacancy Information

**Vacancy Announcement:** 2017-284AA

**Position Title:** Director, Office of International Monetary Policy

**Series:** 0110

**Grade:** ES

**Location(s):** District of Columbia, DC, US & PA US – Licensed in each U.S. state (50 states) and the District of Columbia (Washington, D.C.)

**Veterans' Preference:** NOT A VET = Not dealt with

Veteran status, including with Veterans' preference, left open to work out concerning United States historical involvement on high ranking officer levels through the past more than 30 years

Please send relevant job offer or acknowledgement to me directly to indicate mutuality and authenticity. A professional employment package is required in order to sufficiently set dealing with any relevant matter involved. Full job autonomy is expected, along with a full status of honor, incontestable ongoing indefinitely (which also means I cannot be fired—have employment terminated adversely). In addition, required is an immediate student loan relinquishment honor (which relinquishes any remainder of student loan debt from the 1980s and early 1990s, the times since I was requiring to be dealt with to the point in time of me being dealt with concerning the nationally relevant issues involved).

Joseph Mallon

(Joseph Mallon, DBA-c, FLMI, FFSI)

##### **All grades responses**

## ECQs

1. ECQ 1: Leading Change - Involves the ability to bring about strategic change, within and outside the organization, to meet organizational goals. Inherent to this is the ability to establish an organizational vision and to implement it in a continuously changing environment. Competencies: creativity and innovation, external awareness, flexibility, resilience, strategic thinking, vision.

Answer: The first area of change required for further changes is that my starting will be done from my headquarters location in Pennsylvania. The policy on changes are to implement changes that are not just for the purpose of making changes but are for making constructive changes, changes that add to advancement. One such change is the first one that is with me starting from my current location and going on from there. Some traveling to other areas of the country or beyond may be done as is appropriate, but all work or main work will be done from Pennsylvania, especially during the first year or two. In addition, and for the distance working purposes, full remote working capabilities will be maintained and implemented through the term of the involved director position.

Working on the correct issues involved with a situation is vital to producing a successful outcome. If working on incorrect issues, the results will not be good, but if working on the right issues, the results will be ideal. Determining what the true issues are is necessary. Those issues can then receive attention and work out to produce the best results possible. Situations are often complicated. Multiple issues may be involved. Some issues may take care of other issues. If deciphering the primary issues from the sub-issues, the primary issues can be concentrated on so that the sub-issues will simultaneously advance at working out. Continuance of a matrix of advancement builds momentum that ensures the best outcome possible.

Always considered in my career are political, economic, social, technological, and administrative factors. A political perspective is viewed because *God's Miracle Cross* was an authentic miracle that I discovered in the U.S.A., and this miracle cross was significant to the society. Economic considerations always remained included because money was necessary to use in the U.S. society and because *God's Miracle Cross* was priceless wealth in itself and involved any level of money. Social issues were involved, too, because I was a real person who required mutual work done concerning this miracle cross that affected my lifestyle in the society and among other societal members.

Technological factors were included because computer types of technology were increasingly used in the society through the 1980s and 1990s, and plus, technology was used as an additional way to deal with *God's Miracle Cross*. Administrative aspects were always involved because *God's Miracle Cross* was something that had to have work done, and everything required reaching worked out points. This development work is in addition to me receiving a Master of Business Administration degree and pursuing a

doctorate in business administration. All this development went on for a long time. In my book, I explain about the situation involving years and about the issues involved needing to reach worked out stages (Mallon, 2006). Currently, the issues need working out without additional years passing by. I continue to work on all this development and invest in this development as best as I can, but also, I do have to have many supporters, and people and organizations have to do what they are supposed to do on their levels.

National policy-making is a function used to set a direction for this country to go, and the implementing of a policy is this country going in the direction of the policy. This country, U.S.A., was set up to have three branches of government: judicial (judiciary), legislative (Congress and Senate), and executive (Presidency). This enables checks and balances so that the government always stays functional. States are governance entities within the bounds of this country, U.S.A. Within the states are numerous local governments such as cities and counties. A political appointee is someone a public official appoints to hold a position, and this is as opposed to a position that is an elected position. Interest groups are people organized together to advance or protect some particular interest.

Various strategies remain possible to work accordingly concerning all parties involved and with their interests kept considered and balanced. An article reviewed was the author, Bartel (1987) interviewing a political science professor, Adams, and this consisted of questions and answers addressing political concerns. One question Bartel asked Adams was what advice to give to U.S. Congressmen and Senators. The answer Adams said was overwhelming congressional representatives and senators with many little decisions has happened too much, but a better situation would consist of unifying people's freedom with the interests of public interest groups and synchronizing free enterprise with democracy.

Communication is always something important, and upholding communication accordingly is another aspect relevant. Letting the emphasis be what the expression meant increases understanding and enables a correct outcome. Maintaining the importance of communication being valid keeps the communication real and having proper value. Persuading good faith effort made continually is another quality additive to functionality between people, groups, and organizations. Always important too is upholding the interests already worked in accord with, which includes keeping successful all relevant business involving these interests.

Through the past years, work occurred concerning all the various levels of governance. Working on local levels occurred, and city, state, and national levels of work occurred too. Performance of this work completed in various ways and at various times through the past years. The main necessity was always for what was involved with *God's Miracle Cross* to receive its due furtherance, honor, and reward (Mallon, 2006). After all, this cross was an authentic miracle in this country, U.S.A.

Involved also were additional merits and interests (such as books authored, work done, money needed, and time passage), but nothing was as much as *God's Miracle Cross*. All applicable government directions were gone. Strategies kept all secure, valid, active, and worthy. Balancing all interests resulted, and maintaining the original interests continued. This upholding is why still much success accomplishes in these directions of all involved with *God's Miracle Cross* (Mallon, 2006).

2. ECQ 2: Leading People - Involves the ability to lead people toward meeting the organization's vision, mission, and goals. Inherent to this is the ability to provide an inclusive workplace that fosters the development of others, facilitates cooperation and teamwork, and supports constructive resolution of conflicts. Competencies: conflict management, leveraging diversity, developing others, team building.

Answer: Leading people is something that has to result in a right way. Worthiness and propriety are essential ingredients in a functional leadership activity. The leadership role requires support and regard. Leadership is not just someone assuming a leadership role, but rather, leadership is someone who earned and deserves a leadership role.

When being in a leadership role, a good job has to accomplish, as with any job. However, along with leadership comes many advantages. People listen more to what the person emphasizes and regard more concerning the person. Additional pay and incentives are likely, too. Beyond this, the job is more fulfilling.

High-level inspiration is an experience when accomplishing meritorious achievements while in a leadership role. When being so inspired a person in a leadership role can and ideally will pass on enthusiasm to subordinates. This inspiration helps subordinates to do a good job and be successful on their levels.

A leader doing well may also be a role model for other people and may set many standards concerning other people. A leader who does well will excel in the leadership role and will further develop in the person's career because the position has enough capacity to enable this development. A position that is less than a leadership position may not be able to do or accomplish any of these things that a leadership role can.

Being a leader is not always easy. A leader has to be a responsible person, and has to be successful in the interests of all stakeholders. In an article reviewed, the author (Maak, 2007), says that business scandals in past years caused people to realize that responsible leadership is necessary. The business will be successful only with responsible leadership.

Maak (2007) explains the inappropriateness of taking risks for merely a few thrill-seekers, and instead, the many stakeholders have to receive benefits. Leaders have to be responsible for what they do and have to consider all stakeholders before doing

something that will produce some kind of results. Results have to be pleasing and of benefit to the interests of all stakeholders.

The stakeholders include sponsors and people working along. People who have some kind of monetary amount at stake are stakeholders even though these parties are not directly working with the leader or business. In addition, the people who are working directly with the leader and business are stakeholders. The leader has to do well involving the people who are working directly along because these people are also stakeholders.

These people working directly along, who are also stakeholders, have to receive motivation to do well. They have to have guidance to do well. These fellow workers have to have their appropriate amount of empowerment to maintain themselves and justify the work they do without needing to be overly concerned about doing anything. These people have to have their level of freedom to perform their best and to strive to improve and accomplish notable achievements. The leader sets the structure for personnel to be successful.

A point of interest concerning *God's Miracle Cross* is that this phenomenon remained preserved for more than 25 years so that people would have an ability to deal with this miracle cross. If the preservation did not happen, no one would be able to deal with *God's Miracle Cross* at all. Much potential that the society has would not be present, and any accomplishment achieved concerning *God's Miracle Cross* would not be possible.

Through years, no organization conferred a reward for anything involving *God's Miracle Cross*, and this is no matter how meritorious the work was. Leadership had to occur responsibly in order for anything to still be around or possible now. The leadership was often not properly honored, but honor was always worthy and is even still due (Mallon, 2006). The honor is important for *God's Miracle Cross* to receive proper regard and for any party involved to receive regard or honor.

3. ECQ 3: Results Driven - Involves the ability to meet organizational goals and customer expectations. Inherent to this ECQ is the ability to make decisions that produce high-quality results by applying technical knowledge, analyzing problems, and calculating risks. Competencies: accountability, customer service, decisiveness, entrepreneurship, problem solving, technical credibility.

Answer: Working is doing something, and each work done is an accomplishment achieved. The person who does the work earns a reward, and the party for whom the work completes pays the reward for the good work done on that party's behalf. The person who does the work takes pride in the work because the work's effort and quality are valued. This situation makes the person more responsible for the work because the

person cares about the work done. The party paying for the work has interests in the work too and is a customer or client. When the customer pays for a good work and the worker receives the money for the work, good business has resulted. Business of mutual benefit is the ideal.

After doing a work for a first time, the basics of doing the work remain known, so the work can complete a little better the next time. After many more times of accomplishing the work, skill perfects, so potential exists for adding to the work progressively. Making a good faith effort to do better work or provide better service is a situation of continuous improvement.

Sometimes all work involved with a project cannot just be easily done in a short time, and before significant advancements have been made, full support or funding may not be available. A building up of the support and funding is necessary although may not just happen quickly or easily in the immediate times. A continued devotion to the project's cause is essential, and keeping the work progressing must result, but true benefits will not be realized until after support, rewards, and honors are present. Keeping everything going may require additional work. Contingency plans may need applying, and a little extra maneuvering may necessitate. With the work or project truly being worthy, all holds up and just needs to progress further to points of being able to stand alone.

*God's Miracle Cross* is the most significant aspect involving me. I have not yet received rewards, nor have I yet participated in any mutual work done officially or on primary levels concerning this miracle cross, and the present time is after more than 25 years. Many achievements accomplished involving *God's Miracle Cross*. The design of this cross has acquired a patent and copyright. Originating many text documents has resulted. Books authored and copyrighted additionally resulted, and the first book went into the public domain in 2006 (see Appendix). A company, *God's Miracle Cross Company, Inc.*, was incorporated in 1995 based on this authentic miracle.

Much communication relevant to *God's Miracle Cross* remains around. The creating and maintaining of specialized websites occurred too. Originating advanced materials relevant to *God's Miracle Cross* continued through an MBA program, and this advanced creation remained done through a doctoral business program and proved to go beyond the abilities of the university itself. Plenty has already accomplished, and much more still has to result, but also, what is very important is that the issues involved in these directions receive due diligent work in the rewarding and honoring ways appropriate.

4. ECQ 4: Business Acumen - Involves the ability to manage human, financial, and information resources strategically. Competencies: financial management, human capital management, technology management.

Answer: Active business continuance needs considering, and whether there are needs for the work to be done must be contemplated. The amount of funding needed should be considered. Some additional considerations are how many people will be needed for the work, how much work is involved, how much time will be necessary, and what types of resources should be used. After making these considerations, all that is needed must be secured. Next, the secured resources need to be managed correctly so that usage is optimal for effectively serving the purposes and reaching the goals.

The management of any project has to be done in the way that is right for the particular project. The management style is determined during the contemplations, and some type of plan is drawn up. Included with the plan may be how to allocate resources at the project's start and throughout its continuance. Further, some of the staff may be assigned duties involved with resource distribution and record keeping. Adequate reports then only need to be made.

In these days, all reported information would be on a computer system. The system information would be reviewed, worked with, and stored. Continuing reviews are possible to consider how to improve what has already been being done. Appropriate use of technology makes this review function more possible than without technology and enables a much greater amount of information to be included in a shorter amount of time than would be possible without technology. With the right people doing the right work, the most and best work is doable on the part of the staff, the technology, the finances, and the resources.

With *God's Miracle Cross* and the company named after this cross, the main aspect to keep remembered is that the rewards and honors due have not yet been bestowed. All work done was without benefits received yet. This situation means that the best that could be done with the little available is what had to be done, and that best usage is what was done. Success was consistently achieved, and full potential was maintained. That is why so much has been done recently and why so much is still possible. This situation is not something arbitrary because work on *God's Miracle Cross* has been being done through more than 25 years, and the company, *God's Miracle Cross Company*, was incorporated in 1995 and is currently more than 10 years old. Therefore, the true situation is well established and is primarily just a situation requiring advancement aligned with rewards and honors due.

5. ECQ 5: Building Coalitions - Involves the ability to build coalitions internally and with other Federal agencies, State and local governments, nonprofit and private sector organizations, foreign governments, or international organizations to achieve common goals. Competencies: partnering, political savvy, influencing/negotiation.

Answer: Communication is always a base necessity, and unifying enables progress on group and organization levels. Not much will result without a sufficiency of

communication, and for the presentation of or response to information, communication necessitates. For any kind of agreement, communication is required, and ethical business practice includes an adequacy of communication. The communication may be in any form and to any degree, and appropriateness is all that is necessary. Adequate follow-up may require, depending on what the communication involves. To work issues out requires dialogue between parties involved, and this dialogue must continue until reaching an agreement. Communication in business has value and could involve much additional that has value.

Plenty of communication transmitted involving *God's Miracle Cross*. This specialized communication occurred because this reality was something that had to have work done and for the first time without ever having been accomplished before. Because this reality did not ever previously have work done, greater difficulty was involved with dealing with the miracle cross. The present situation is currently with more than 25 years involved before *God's Miracle Cross* has had its necessary work done. For something to have its requirements handled, working out the necessities involved has to result, so until that sufficiently happens, that remains requiring.

The good faith effort made so far has been communication in every form and in every appropriate direction through the years. Right now, websites are around and a book is out in the public domain, and this is in addition to important communication sent to the White House in Washington, D.C. in 2006 and 2007 (and 2017). The communication sent to the White House involved potential business ranging up into the hundreds of millions of dollars in the beginning times. Of course, in order for that important U.S. national business to accomplish, communication had to come back to me so that something worked out would truly result. Full potential continues presently, and communication remains necessary to realize the potential.

### Additional Information - *God's Miracle Cross*

(This miracle cross itself is an honor that there is nothing more than. It is the highest honor that was bestowed to anyone on Earth and in history.)

With the conferring of this miracle cross honor, the United States was transcended, and the United States was within the bounds of this honor, authority, power, divinity, and sovereignty.

## MTQs

6. MTQ 1. Broad knowledge and demonstrated understanding of the international aspects of U.S. economic policy formulation and U.S. participation in the International Monetary Fund and international fora, including the Group of Seven and Group of 20. Broad knowledge and demonstrated understanding of the development and implementation of U.S. policies relating to the operation and evolution of the international monetary system.

Answer: Mandatory Technical Qualifications 1: Advisory - Working with the key agency officials through the past three years, the following policies, programs, goals, and objectives formulated and now require nationwide and international advancement throughout all multi-state areas and countries applicable. The potential impacts include positive and negative elements, but the negative elements comprise of attitudes while the positive elements include necessary advancements essential for this country's success. The directive set for immediate and continuing implementation consists of the following information vital to include, comprehend, and work out among all committees, workgroups, meetings, conferences, ceremonies, and events involved.

General Statement - As the Director, I along with the region's staff must have essential qualifications, such as previously receiving an MBA degree. I, as the leader, additionally went on to take doctoral courses and earned a business doctorate beyond the then involved university's capabilities or worthiness of rewarding, recognizing, understanding, or handling. The courses completed have relevancy to the mandatory technical qualifications required here, such as researching active issues relevant to the economy, finance, and law concerning insurance and reinsurance organizations, the International Monetary Fund, and Nation groups functioning in the business domain through the societal times. (See official website [www.godsmiraclecross.com/id224.html](http://www.godsmiraclecross.com/id224.html), currently sealed offline from viewers without appropriate level security clearance; additional information available upon request). The merits emphasized herein must, as this director's does, meet or exceed the requirements specified as necessary for this director assignment position.

Precise Description - The times go by, but not all times consist of the same details, of course, because some times for this division and its agents will stand out as comprising extra notable aspects. An advancement will result, or a key incident will happen, and all will, as it should, receive due attention and reward. In past

times, the director made a discovery, referred to as *God's Miracle Cross* – an authentic miracle discovered in Philadelphia, Pennsylvania, U.S.A. in 1981, and through the continuing times, the director noticed the discovery as having factual qualities of something significant, sort of like the beginning of flight or United States policies concerning the international monetary system, advancements of civilized society. As time went by, the director learned more about the discovered reality. Through the following times, he did extensive work relevant to the discovery. Not everyone did the work necessary, though, as records from monitoring show. All stakeholders did not yet do the formal, official, or mutual work concerning the discovery or the work involving the discovery, thus making this work extra vital to this region and country.

The substantial experience, including fairness, integrity, and independence, exhibited through the previous years. Similarly, authored books, such as the director's first published book, *Dream Book: From the Book of Dreams*, which has status as the first book in history to include *God's Miracle Cross* (a unique discovery, which was patented and copyrighted by the discoverer – the director), further add constructive pieces to the development of the regional strategies actively implemented to issues known as requiring immediate attention for ongoing continuance toward inevitable upcoming demands. Each document the director wrote relevant to the discovery additionally expressed developing, adapting, and implementing detailed and representative practices concerning activities on a complicated organizational level consistent with this division's standards involving law, policy, precedence, and regulatory provisions. Further, during accredited academics such as a doctoral program and incontestable doctoral practice, affiliates can, as the director did, further one's analytical and simulation techniques. These techniques are used to work with important aspects of the surroundings, as especially exemplified when specifically including and working with the mentioned company or discovery.

7. MTQ 2. Significant experience conducting extensive, complex policy analysis and developing recommendations on multilateral economic and financial issues consistent with U.S. economic interests and U.S. strategy to advance institutional reform as well as promote policy objectives in the International Monetary Fund and other international fora. Demonstrated facility with analytical and U.S. policy priorities relating to major substantive issues including the size and distribution of IMF quotas; allocation of Special Drawing rights; amount, terms and conditions of IMF financing; and IMF surveillance of macroeconomic and financial policies.

Answer: Mandatory Technical Qualifications 2: Advisory – Following the past more than three years of work done to formulate the years of plans necessary to monitor for budgeting and performance purposes, the following policies,

programs, goals, and strategies apply. All involved here continues in administration, record keeping, and evaluating to ensure accuracy, integrity, progress in accord with all applicable laws and policies. The information provided herein requires its due attention and performance of duties necessary to bring about all the sought results expected and necessary for the fulfillment of the goals essential for this country's advancement.

General Statement - When considering historic events, human centered interactions, business, and the community, the previously mentioned experience applies to working on any advanced status such as grade 15 (or closely higher or lower status) Federal government level in this area, and important ability can illuminate. In addition, from the distant past, the director's experience includes work with many claims such as insurance claims and people involved with serious incidents and natural disasters such as tornadoes and flooding. Further, of course, many people in association know of the public resources and their historical information.

Precise Description - In years of professional experience, the person qualified, such as the author, for the Director position has done much work that involves formulating, implementing, and over-watching various types of programs and projects. Additional education relevant further polishes skills. Through a professional level educational graduate program such as the MBA program, multiple courses involve project management study, which consists of techniques and skills for conducting complex agency-level activities. Higher-level study can continue in doctoral program courses, and further, these courses and post-doctoral work can presently continue online and offline to the point of receiving doctoral and post-doctoral honors in business, comprising of areas with unique matters requiring supportive cooperation to ensure positive directions gone.

Advisory - Reports concerning administration of the information provided from the past more than three years of the agency's work store conveniently in the computer network filtered through internal electronic security to the intranet drive accessible for further work. Complete online and offline functionality remains active for administering all aspects of findings concerning any relevant laws and policies. Consultation to all involved officials remaining in office during the continuing active terms details in the next information reported.

General Statement - During an MBA program, such as this director went through years ago, extensively worked on areas include writing, research, making presentations, and reviewing financial information. Likewise, in a doctoral program and post-doctoral work this regional director engaged in, further review of everything continued in greater depth, as added in areas include working with

and originating various types of qualitative and quantitative studies, teaching other people, and working with laws and policies in ways such as researching and applying Federal regulations. The writing during the MBA program developed into including accepted professional writing styles and research to support expressions. The MBA courses had requirements that included creating PowerPoint presentations. In addition, reviewing financial information, including with charts and graphs, consistently occurred, just like in the doctoral program and beyond it. Additionally, as extra extensively in the doctoral program and beyond, extensive review of journal articles continued in guidance to produce works on quality levels consistent with works ready for submitting to authoritative peer-reviewed journals. The research works could involve investigating legal actions that may have missed vital elements and caused legal and business deficiency.

Precise Description - Academically and professionally, this director has demonstrated ability to research, write, do presentations, work with financial information, educate, and perform legal research and expression, while maintaining characteristics such as fairness, integrity, and independence concerning functioning on an advanced agency level. In addition to mentioned demonstrated ability, the director continues demonstrating abilities while practicing ongoing and working on graduate levels now in more than 10 years of a business doctoral program in post-doctoral times for more than five years. This director has extensively exhibited the competencies necessary for executive positions, including with the United States Government.

8. MTQ 3. Extensive experience representing the United States in international settings and communicating complex issues and ideas to senior foreign government officials and external stakeholders in the international financial community. Displays ability to convey observations and recommendations related to international macroeconomic, financial and political economy issues, providing context for major economic and financial objectives in foreign country economies. Diverse experience with the U.S. interagency, including coordinating and managing complex policy development processes and representing federal departments or agencies in negotiating USG views.

Answer: Mandatory Technical Qualifications 3: Advisory – Reviews continue on a quarterly basis consistently and sporadically, and annual reviews post electronically in the intranet for potential publication on a public website. Procedures at advancing the substance of the information reported through the past more than three years require immediate and progressive administration to direct performance of work tasks set for achieving sought goals of all objectives, laws, and policies applicable. The following essential information provides the backdrop for all performance evaluations of associates and programs.

General Statement - Being that the director has many years of business experience, he naturally has significant experience that goes into business and its financial workings, communication and advancement concerning the United States but also any country of the world. This director has gone through and accumulated much business information, and he has maintained volumes of this business information through a significant amount of time, such as maintaining applicable financial and intelligence records. For additional information concerning fulfillment of this applied for position's requirements, please review this presented information further.

Precise Description - Considering the professional community, I, as the Director, should receive an according regard in any field area, including governance, because my work is comparable and can be specific and direct, if that is the direction I turn my attention. I have an astute awareness of history concerning any country, civilization, and humanity. I understand civilization's advancement such as bartering to using money and including electronically. I additionally understand further advancements and associated dangers and risks requiring improvement. I have worked through many years in various industries, including 10 years in the financial services and insurance industry, and I have had many dreams involving professional fields, industries, civilization, and the United States society, as is expressed in my first published book, previously mentioned, *Dream Book: From the Book of Dreams*, which is in a first edition form, although a second edition form is overdue and may be put out sometime soon in the future.

Because of having true qualifications and worthiness for the official executive professional position of Director with the United States Government, I have extensive knowledge of the professional community, but additionally my knowledge always has capability of growing and advancing further. For me to have recognized standing in research, I only need my work reviewed adequately and to receive recognized standing in research. Further development and recognition will result as I continue my practice and to advance my work to additional domains through the time passage.

With advanced capabilities, and capital to work with, accomplishing achievements has possibility, whether in the form of bridges, cars, crosses, companies, power generators, books, boats, planes, or rockets or in the form of monetary use, policies, or systems. I review, evaluate, make reports, and set accurate information in a type of display presented on an acceptable medium.

9. MTQ 4. Experience providing leadership and direction to a team while executing day-to-day activities and operations in an institutional setting. Familiarity with institutional approaches and processes to managing staff, including performance management, coaching, and counseling. Demonstrated

experience within an institution: articulating long-term strategic goals or vision; building the organizational framework to achieve mission, including initiating organizational change; and spotting and exploiting opportunities to move individuals, team, or organization toward the vision. Experience managing group processes; adapting leadership style to various situations; managing and resolving conflicts, confrontations, and disagreements in a positive and constructive manner to minimize negative personal impact; encouraging and facilitating cooperation, pride, trust, and group identity; and fostering commitment and team spirit.

Answer: Mandatory Technical Qualifications 4: Advisory – News illustrates as constructive if retained for further administering. Daily performance of required tasks ensures success through the weeks, which adds to each associated professional person’s successful term and career, as United States laws, codes, and policies protect during good faith continuance. Further regulatory compliance with any and all applicable codes, laws, and policies will result when continuing the successful administration of the policies, rules, and guidelines set after the past more than three years of arduous work done on this country’s national state and best interests for present advancement and future conditions and prosperity.

General Statement - To influence stakeholders’ understanding to welcome and support endeavors I engage in or sponsor, I keep up accordingly in the present times, but also, I have much work I did through the past, including various works presented publicly, such as the previously mentioned book and professional and academic associations and status profiles. These works completed prior to receiving full funding, so much extra work went into the funds needed for securing resources, and vulnerabilities continue affected by the economic fluctuations and the state of business in the society. That work and my merits should receive adequate honor due for me to do my job of leading this agency’s projects successfully and because of the intrinsic qualities of the works. Such works, which I expect as the caliber of work achieved under my authority as Director, fulfill the base necessities, but in addition, include many extra features and extend far beyond only base level requirements.

Precise Description - Stimulus money can boost public work. States set their budgets according to their funds available. All levels need coverage and adequate funding, including direct or micro-levels. The appealing areas need coverage, but foundational aspects need inclusion, too. Some needs analysis appears best to include.

In the past I have considered some projects for purposes of advancement and achieving high quality in the subject-area. I have extensively considered improvements to already advanced areas. After I do a needs analysis concerning

forwarding past ideas and continuing present endeavors, I make my report, which necessitates ongoing adherence to my directives and steady follow-ups. In all times right, I make my statements with authority and expertise of the highest ranked official in the area, and my expressions have to remain enough to serve the required purposes, provide the pertinent information, and set the direction continued.

General Statement - For all the skills and merits expressed, my technical qualifications meet and exceed the requirements for this position now sought. Those agency staff members involved with working on my professional position within the bounds of my emphasis can now commence the conclusions of settling the office.

Precise Description - I know that with an adequate regard and comprehension of my expressions, merit and worthiness are noticeable and enough for a forward moving situation. My professional technical qualifications are fully enhance and are complementary to my executive core qualifications that would be additive to have in full functionality of this applied for professional position. I will continue following up accordingly concerning this issue of my professional position having full functionality and all that further expresses the merit and appropriateness of this professional position situation advancing in mutual terms.

**JM-2011-0018 Mallon**

Hello John DeStefano,

I am communicating again here because of the rightness of the timing and various aspects involved. We have Internet capability in these times, and enough physical has to also be included. I have expressed interest and worthiness of an advanced professional directorship level professional position with the United States government. I am sure that you here know when a person is officially dealt with or not by the United States, and you know how to reach me if intending to for real. All continues as I expressed here and in my previous communication, and I am presently watching and evaluating with approximate monthly time intervals to the end of this year of 2017.

#### **Doctor of Business Administration since 2012**

I achieved A final grades in all of my last courses of the doctoral program in 2011 and 2012. These courses included standard doctoral courses and dissertation courses. By when I finished my last course of the doctoral program, I had an A level grade point average (GPA) and an excellent, more-than-passable dissertation. I immediately submitted my dissertation into the Quality Review Final (QRF), which is similar to the old-style dean's office, for final review. I was very efficient, and my dissertation was in the QRF in optimal time in March 2012.

I thought I would be finishing up the ending of the doctoral program in the summer of 2012. What happened, though, was that time went by, and time went by with my dissertation in the QRF. I reached points to where I called on the phone, and the summer of 2012 was

gone into and through like this. By in August 2012, I was consistently calling on the phone about my dissertation and even more so in September 2012. The time was six months later, and when I thought I would finally get back my dissertation, passed, and with congratulations on finishing the doctoral program and being a doctor in my field, I received back a QRF message totally debauching my dissertation.

The debauchery was in no way accurate or constructive and, instead, was primarily insulting and obstructive. Six months should not have been wasted like that, and there was absolutely no justification. My emphasis was that the university should apologize to me and send my dissertation back into the QRF to be done right. I had a meeting with some of the faculty members, but following, they did not proceed in cooperative ways. I had to just do more myself, as I certainly did through the next months and years.

Without reviewing everything all over again here, I truly earned and should have received my doctorate in 2012. I want that dealt with by officially recognizing me as earning my doctorate in 2012 and then doing post-doctoral work since then in 2012 to whenever a full settlement here is reached. I want to be understood as being a doctor in my field since 2012. My dissertation has to be published in a successful manner fitting for an honorably completed doctoral program, worthy of any doctoral or Ph.D. level. Concerning here at the White House with the Trump administration in Washington, D.C., I request that these mentioned aspects be understood and included as a part of my professional position package for my directorship division of the United States Government.

## **Status to Honor**

When working with me, transitioning has to be done, but also, the transitioning has to include with me being on my directorship levels. I have to be securely working in my leadership capacity because I cannot be misunderstood as being on any seemingly inferior or subordinate level, and I cannot have to go through years or any amount of time waiting for others to deal with me as being on my right status level. I cannot have to be working to move up and have to be already moved up, as I should be. I have to be developing and advancing on my levels and cannot be stagnating while only others are progressing. The only way I can truly do what I am supposed to do, and add as I should, is if I am functioning on my appropriate status levels.

## **Section concerning Relational Letter**

In case there was any wondering here why I previously sent the relational letter, I will further explain a little here. Mainly, I wanted the current administration to know a little about what was going on. I wanted to further express about a little of what I have been confronting and why I do or say some things as I do. In addition, I have written about this situation since many years ago. The time consideration shows in the relational letter, which expresses the past more than five years and with the clock still ticking.

I originally wanted my wife and was everything good for her. Something was constantly wrong on her end of things, though, because out of everything and no matter what, I kept not getting dealt with right. Communication was excessively not made to me. When she had

practically all the resources in the world available, nothing was worked out with me. I was left not dealt with and with everything still requiring.

Presently, I still want my wife, but also, again, take a look at the time that the relational document expresses. I am not sure if the woman involved can even deal with me at all or be or give me my wife. The situation was not like this years ago, and we only had to get together and stay together. I only had to be properly dealt with, but now, I am not so sure, even if I am dealt with. At the same time, though, I still have to be dealt with and have rights to my wife.

I included this relational area here because of the situation and professional position involved being more than usual. I would not usually include this area when expressing about a professional position. I do not usually say about these things while working. There is relevancy here, though, because of the 30 years of United States involvement and high level Federal Government position involved.

The described woman will have to be vetted as having right intent. She will have to be making her efforts to deal with me and to work out the situation with me as best as she can. She will have her work to do and plenty of it, and she has to be doing her work. She has to know and be responsible concerning what is going on involving her and us, and I cannot have to excessively explain about anything involving us.

I covered this relational area as I should. The rest has been explained in past years and in many different illustrative forms. My authority, wisdom, rights, and worthiness have to

be respected in these directions. These requirements continue as time goes on and concerning everything there is and everything done.

I think that she would have to agree to and sign a formal document saying that she will faithfully cooperate and will not now or ever contrast or go against anything involving me. The time involved is so much that some extra assurance is needed. I will keep good intent, but I cannot be pushed or not regarded concerning what and how long I went through. She has to do enough of what she is supposed to do and give a little on her part, even so that I can be doing what I should be doing on my part.

There is much more to say in this area, but it is not needed here. I just wanted to cover this area because of its relevancy and importance and because I previously sent the relational letter. The situation involved is still active and ongoing. I further feel that everything here in my interests would be good for her.

### **Timing of Active Communication**

The time of this message is finishing October and going into November 2017. I have expressed about my background and have shown my consistency through the past six months. The background and consistency will assuredly continue, but also, I would like to see some solid progress made here with the Trump administration and the United States government. By Thanksgiving, the situation would be good if I was to receive word back saying at least that I am being worked with in mutually agreeable and progressive terms.

By Thanksgiving, I will see that I am either dealt with to some extent, or I am not. I will then set my sights on Christmas and going into the new year, and of course, I will either be working with me being dealt with or working with me not being dealt with. I can say right now that I would prefer the positive reality of seeing some progression made, and I will definitely be noticing and dealing with what I see the situation is involving me and concerning the United States.

### **Talking about Authority**

The area of authority has to be covered, too. I have to have my authority. My authority has to be high level and fully secure. This authority has to have its degrees of strength, independence, and virtue. The job needs the authority built into the professional position, and the levels, merits, and necessities justify the applicable authority.

I do not express here about authority egoistically. I was supposed to have authority years ago. I was supposed to be a lawyer and a very important person (VIP) of the United States, and I have worked in these ways with everything requiring for more than 25 years. I additionally was supposed to be a doctor in my field of business administration for more than 5 years now (since 2012). I had to go through a quarter-century before being dealt with, rewarded, and honored.

The professional levels involved did reach these points through past years. There was always much potential and importance, but also, with all involved excessively not dealt with and left requiring, many difficult times were caused. I went through all that turmoil before

being honored concerning the meritorious aspects. Regarding all that time and turmoil while preserving much important to this country, the United States of America, there is a serious side, and there has to be authority where it belongs. For these, and other relevant reasons, I express that there has to be authority I have included in my United States government professional position, director.

### **Further Updating Report on U.S. Education Issues**

I previously provided information about a type of legal action taken against online universities, such as the one causing me to not formally complete the doctoral program in the very ending times for 5 years and after 5 previous years (10 years in total). The organizations involved with working on the appropriate legal action, apparently had everything backfire against them. Although people like me, who were their clients, waited patiently for 5 months or longer for right results and had years of legitimacy, quick action was taken against these organizations. I would truly like this legal action looked at and considered for further work in appropriate, equivalently effectual ways. One question that jumps out is - *What happened to the work the U.S. Department of Education was doing?* There were many people, myself included, who had legitimate complaints against these strayed online universities, such as the one I have expressed about, the University of Phoenix.

As another part of my directorship post with the United States government, I want included authority to work on these education issues. My authority has to be equal or superior to the authority of anyone else involved or who will have or make any say of true

consequence. I cannot be the only one doing the work, but I have to have my authority and see what I should be seeing, and the people, myself and others, working in these educational directions have to be taken seriously, respected, and advanced with the true cause of action.

### **Further Considerations Relevant to Stakeholders of the United States**

Consider some of the issues coming out now in 2017. Seemingly legitimate people, and entities vicariously, were found to be acting totally illegitimately and unlawfully. According to the latest series of events in these education directions, this area appears to be another one of those harshly criticizing and accusing, quick-actioned areas that have more involved than only righteousness, worthiness, honorability, or lawfulness. Retaliatory character attacks are not acceptable, and discrediting of work or credentials are immediately questionable and subject to further scrutiny. Full reports worthy and legitimate have to be regarded as top priority. All here is meant to be understood correctly and is not meant in any kind of reversed way.

Further consider that the situation would have been better and righter if I was dealt with through the past years of 2009 to now in 2017 and instead of the improprieties through those years. Relook at those director level United States Government professional positions I submitted applications for up to in 2011. Consider the very worthy, highly successful, and extensively honorable dissertation I made and doctoral candidate status level I achieved by in 2011. Shortly following while working professionally, I became licensed in each state of the United States and the District of Columbia–Washington, D.C., and I maintained that licensing

and professional success from 2011 to now in 2017 and before being rewarded or honored concerning that merit or success.

I continued diligently working professionally, and I earned my doctoral status and continued as a doctor in my field and while working in post-doctoral academic levels through those years of 2011 to now in 2017 without or before proper crediting, acknowledgement, or support from parties involved, such as the mentioned university. I actually finished the true doctoral program in 2012 and had an A level grade point average (GPA). I am not only extensively qualified for the directorship with the United States Government, but this directorship is truly very much needed and requiring concerning the best interests of all involved with the United States. That is also why my dissertation and the doctoral program is still requiring to be worthily finished on fully accredited American university national levels. A university not qualified or capable of doing the involved doctoral work cannot do it. Left requiring is the necessity for a qualified American university to complete the university part of a doctoral program finished in 2012 and continued with post-doctoral work from 2012 to 2017.

## **ORDER**

In fact, with some of the beginnings of my directorship with the Federal Government, I order this work to be progressed on appropriate levels by everyone of the 5 to 500 or more United States Government representatives that the division commissions. This order needs to be administered on the right levels by professional people who can do the work. The question

is whether my directorship, and its division, is progressing with full support and honor from the United States. Education is another important field of the United States and is requiring improvement, so the educational areas at issue should not be left unaddressed truthfully. In the starting time of my U.S. Government directorship, I hereby **ORDER** these directives be commenced and established.

### Concluding Question Active

Again, the question goes around to whether I will be dealt with. Does the Trump administration give me the directorship job of leading a division of the U.S. Government in the best interest of this country and its people?

*\* Words of Wisdom \**

We cannot do anything if we merely keep getting contradicted.

Subject: Month of October 2017 - worthiness for securing professional position

Hello John DeStefano,

I have an excellent dissertation that is for me to receive my doctorate. My specialty area is business, so the dissertation is business oriented, although also included are other areas, such as education, law, politics, and religion. My dissertation is very advanced, which means it goes beyond usual and includes various luxury components in addition to all the necessities for meeting top quality doctoral standards. This dissertation can be described as a model dissertation and one which any quality dissertation should be at least meeting basic comparisons. More or better than this dissertation is not needed, is not appropriate, and does not exist, and all that is needed and appropriate for dissertations is a difference, adequately meeting basic comparisons, and proper intent and worthiness.

My dissertation is qualitative and is in the form of a case study. This case study is about stakeholders excessively disengaging instead of engaging in business relevant to their interests and responsibilities. A main point of the dissertation is that worthy parties should be receiving rewards and honors due and should have plenty of successful opportunities. The dissertation has a thematic framework of stakeholder theory, and the primary question the dissertation addresses is how can the excessively disengaging stakeholders reverse to be adequately engaging in mutual business endeavors. A triangulation is done in the dissertation and can be described as a data source triangulation of three domains, which are some of the dissertation luxury features of articles, dreams, and websites.

A main point here is that the university involved did not do its part. The university excessively did not do its work it was supposed to do and supposed to get done. The university did not complete the doctoral program on its end and would not let the doctoral program get done on any other end, such as mine. My request here is that part of any job offer made to me and professional position and public office for me be made to include (1) a working with my dissertation to finish the very ending times of the doctoral program and (2) bestowing my doctorate formally to me. A copy of my dissertation is available upon request, or I could provide a sample of my dissertation if wanted.

Presently and continuing, I remain working as I have been, and I will not give advance notice to any person or establishment until I see an adequacy of something relevant involved actually worked out concerning my professional position and public office of the United

States government. For now, I would go for the United States government officially recognizing and securing my United States government executive director level rank and status. A means, if I may suggest for example, would be for the federal government to quantitatively add an accumulation from equating to my \$110,000 annual salary to the end of this year of 2017. This quantitative accumulation can be in addition to the capital accumulation for the whole division and including, perhaps, the rest of pays of the 5 to 500 or more people in my directorship's division. I will leave open the rest to the Trump administration's discretion because I am just making a suggestion of something to do and that can worthily be done for now to advance the situation at successfully moving forward.

I am still open to the full professional position package being presented to me. I can be set as immediately working remotely and including in terms of immediately transitioning over to a United States professional position and public office as I am currently working remotely. I have plenty of potential to add significantly to the United States, and I am the only one of the United States or on Earth who has such potential. I am continuing to work appropriately through this present season and will remain watching for any communication made to me from this administration concerning working out my executive director level U.S. Government professional position.

Subject: Following up a little further

Hello John DeStefano,

I thought that perhaps checking in with you would be good. Remember that I am here. Do not just forget about me. I did present some substantial information, but also, I have not been dealt with yet. I mean that no professional position or business relevant has been worked out with me yet.

I have been seeing that the current administration has been going through some difficulties, but I express to not let unjustifiably contrasting people get to you, and remember that people like me are still around with plenty of unrealized potential.

Consider a little here. I am not making any demands, I do not expect everything all at once. I would like a build-up at dealing with me because that is the necessity and the only way to be successful. I know that there would be something involved with dealing with me, especially on a real level. I would have to have full security and authority in my professional position and functioning, and I would have to be on my appropriate advanced status level. That is how people would have to know me and without me seeming to be on a lesser level than them or waiting for them while they go through their careers and lives.

The significant aspects or some of these areas can be worked with progressively. I offer you and the current administration an opportunity to take a few of the significant aspects involving me and work with them a little bit in a way of building (God's Miracle Cross discovered in 1981, United States significance since the 1980s, communicated to the White House since 1983, and currently licensed with one or more lines of authority in each state of the United States). I invite you to see the potential and realize some relevant successes.

Summation of Substantial Aspects -

Many years of Honor-worthiness and societal significance, discoveries, books authored, credentials, supporter and executor of justice, merits, advanced professional person, licensed in all 50 states and Washington, D.C., presently active and valid, champion of a worthy cause, Natural-born American and a U.S. Citizen (also see my previous email).

I continue working through the summer as I have been because nothing else has been worked out with me yet. I am continuing on course and remaining successful on this level. I will continue like this until something additional or something else is appropriate to do. I have been working in this same way through the past more than 5 years. I will not waste time, though, so I will always be doing what I am supposed to do, and I would like to see progress made as the time goes by.

Presently, I just thought I would check in with you to remind you that I am here, am a real person, and have plenty of potential for all involved with the current administration and the United States.

I am including this picture of me to show I am a real person.

Subject: Thought I would check in

Hello John DeStefano,

I made a report to briefly mention some areas successfully worked through during the summer of 2017. Much still remains active and would improve if enough comes of the merits. My invitation to work out the involved issues continues. Much would be added with progressions made.

I continue working diligently. If you want to advance a professional position involving me, you should continue building and aligning with me to points of an adequately full unifying. Further advancements could then be made.

A first point needed to be reached is one where there is mutual awareness and acknowledgement of a unified functioning. An acceptable agreement of the continuing situation progressing satisfactorily is necessary. Everything does not have to happen all at once, but progress would work to settle the situation through the times, and a professional package worked out and advancing would help to handle the particulars.

I am presently looking at finishing the summer season and am already perceiving to finish the rest of the year. Building, unifying, aligning, and merging would help to reach end points that were closer together than further apart.

My report follows. The report is designed to cover some relevant areas particular to my work and to not go into too much or too little detail. I wanted to include enough to be informative, but I did not want to waste anyone's time with too much information.

Also, I am still open to a professional position package being presented to me for working through development stages, which can be immediately done as I work remotely.

Report by Joseph Mallon – (A PDF of this Report is attached.)

**08/29/2017**

## **Report on Summer of 2017**

The time is due for a follow-up emphasis from me. The summer season of 2017 is winding down. My previous communication was in the early times of the summer. Much was done through the summer, and many successes were achieved. A report from me in the ending times of the season adds as a reminder that much was there through the summer season and was a part of the active situation, the projects done, the background platform, and the continuing potential.

### **Active Situation**

The situation continues as it has been but also with consistent earnings, merits, and successes accomplished and requiring honor due. The positive attributes have been being excessively duded out, negated, or contrasted. Rather than the devaluation, there should be facilitation, enhancement, and inspiration. A full amount of success was steadily achieved through the summer of 2017, but another important aspect is to see enough come of the success achieved. The positive movement and advancements have to be there, too, so that the situation improves and the work and successes are worthwhile.

### **Doctoral Program and University**

I also worked more on my dissertation through the summer. I truly should have been let to finish the doctoral program in 2012. I was caused to work through the past 5 years (in addition to the first 5 years, 10 years in total) just on finishing the doctoral program. I recently took 3 more courses in the doctoral program and achieved A grades as final grades in each of the 3 courses. After all that, the university continued with backend burdens that did nothing but cause delays. At the time of going into the end of the summer, I received an assistant dean level declaration that my entire work was inferior in every way and was impossible to meet doctoral standards, and everything would have to be done over.

When I finished the doctoral program in 2012, including with standard courses and dissertation courses, I had an A level grade point average (GPA). My dissertation was good and more than passable for ending the doctoral program at that time. My dissertation remained good and more than passable through the next 5 years, but the university would not let my dissertation pass and me to get done the doctoral program. Just recently, after the 3 additional courses I took, and did very well in by achieving A grades as final grades, the university practices caused the whole summer to go by without getting the university's work done to finish the doctoral program. Then the faculty member on the assistant dean level of this university made the belittling expressions concerning everything involved on my part.

I previously took appropriate actions concerning the unethical university practice. I continued this appropriate action. This action was not just me. I had already a long time ago did all I could do. I continued to do what I could and to do the good I do, but more than only myself alone had to continue to build and, too

much so, remained fully justified to continue. There was a form of legal action taken and advanced concerning this university and other such universities. These types of unethical practices had been going on too much and for too long, and many people have been being negatively affected, including myself.

I would like to see these universities corrected and be put back on track to be the way they are truly supposed to be. They need to be set back on course and be providing accredited education that meets societal standards and that is also with proper intent of providing people with a favorably memorable experience and facilitating, developing, and educating people of the society to advance in their careers and lives. These universities should be endeavoring to be comparable to any of this country's universities. They should not be lowering their standards or lessening people they affect but rather should be constructively elevating people to higher standards. That does not mean just holding people to higher standards with no benefit to these people, but this means to actually improve people to reach higher standards and achieve a mutually desirable end-result.

As good as can be thought or emphasized in the directions of these universities, they have not been doing as they should and have to do better. This emphasis is not against all people of these universities but is that no person or people should cause bad situations or damages in or with the universities. I presently continue watching for results of actions taken.

After seeing an adequacy of progress, further work in relevant areas will be done. The next relevant endeavor is to have ways of successfully clearing all or most academic types of debt. There will be secured multiple ways for people, and myself included, to reduce any academic debt down to zero.

### **Professional Position**

With how I have been working, the levels have been lower than can enable contentment. The best that can be done in the situation is what has always been done. I always did very well and remained successful. There have not been many benefits. The slow rate of progress has been the worst of it because out of everything done and all the time that passed by, the situation is basically the same, whereas with some upward movement, there may have been more possible and that worked out. Promotions, raises, and opportunities have been lacking, and the best that could be done was to keep the same work going and to consistently remain successful without benefits of upward progress.

I have plenty of potential kept in the background and unused as the time passes by. The job involved only calls for what the job involves, and the rest is not appropriate to use. I will not do anything additional unless I have the job where more is applicable. This practice is necessary because the potential areas are not wanted or honored in a job not suited for them, they are not paid for, and they are not supported. I will not budge from the job I have had or work I have been doing unless a bona fide offer of a truly better, more career progressive, and higher-level

job is made to me. I am a professional person, have been very successful on the levels I have been working on, and have worked straight through the past more than 6 years like this. I am professionally licensed in each state of this country, the United States. I have had this licensing through the past years. A professional package would have to be presented to me in order for me to think anything of it or deal with it, especially realistically.

If I was to receive a legitimate offer of an appropriate level professional opportunity, I would instantly work with it and begin building up with it. If truly appropriate, I would give at least two weeks advance notice to where I have been working. There would not be playing around in these directions, and real actions would be taken. There would be real money involved and including money I am being paid.

I would like a successful amount of money set as a pay in the beginning, such as \$80,000 to \$125,000 yearly to start and with a bonus of \$10,000 to \$25,000. The only aspect of this pay is that this amount is what the pay should be. I will still have to have set openness for pay raises and bonuses, and I would like to have other finances worked out, too, since I have financial aspects involved with the United States since back in the 1980s.

### **Unique Historic Features and Potential**

I first wrote to the White House in 1983. I said about a discovery I made here in the United States, a cross that eventually became referred to as *God's Miracle Cross*. I worked through 7 years with this discovery and did send communication to the White House at various times through those years. I always did well, but there was great difficulty in getting the discovery dealt with in rewarding and honoring ways. I eventually had a design of the discovery patented and later copyrighted. I also authored books through those years, and because I was so advanced intellectually, I went through college and went into law school.

As I was in law school, the first Iraq war happened, too. I was at a time when everything required its due attention but was not getting it. Law school could not and did not continue like that, but because I was working on the level of law school, I did various lawyer levels of law work. I eventually made law cases in the United States courts. These law cases turned out as difficult to impossible to have worked out concerning the actual issues involved.

The law cases were made in the U.S. District Court for the Eastern District of Pennsylvania, then the U.S. Appeals Court for the Third Circuit, and all the way up to the Supreme Court of the United States, but all without the issues involved being worked out. I was then left with nothing worked out and everything still requiring. I made more efforts through all the years of the 1990s to get the matters dealt with, and I worked and worked through all those years and also became and worked as a business owner. The years of the 2000s were then gone into, and I communicated

abundantly, kept open communication lines, and made full efforts for the issues involved to be worked out, but the stakeholders were very stubborn in those times.

I kept working diligently in every way appropriate and kept communicating and maintaining open communication lines. This situation continued into the year 2000, through the year of 2001, and remained continuing like this to in 2003 when the second Iraq war started. By this time, I started working on an MBA degree, and the whole situation continued in this way until in 2006 when I finished my work on the MBA degree. I received my MBA degree in October 2006, and at the same time, I published my first book, *Dream Book: From the Book of Dreams*. I further communicated extensively and including to the White House.

In my communication to the White House, I said about issues involved, and I said about the MBA degree and included a copy of my first published book, *Dream Book: From the Book of Dreams*. I then followed with timely job applications to add to potential of the issues involved being worked out. The trouble was that the situation continued like this without reciprocity on the stakeholders' part. Because I saw this disengagement situation happening, I went into a doctoral program to advance my MBA level to a DBA doctoral level. The professional positions applications continued through these years to passed 2010, but I was left without my public office worked out.

With this situation being as it was and with me already being advanced in business, I progressed in the field of insurance as a licensed agent. As previously mentioned, I eventually reached a point of being licensed in each state of the United States and also Washington, D.C. I worked in this manner through the next approximately 5 years. My financial credit score reached over 700. I kept maintaining a successful situation and loaded with potential in various ways and on multiple levels.

I also continued on the DBA doctoral level to a doctoral candidacy, which remained continuing through the past approximately 5 years and as previously described. I remained very successful and with an excellent dissertation but was not let to finish the doctoral program and to receive my doctorate. Now I have an excellent dissertation and have nowhere to go with it.

### **Back Up to the Present Times**

I remained successful through the entire summer of 2017. As I am sure is known here, I communicated to the White House before the summer. I received good word back. I followed-up a little with an emphasis of some of my background to show some of my potential and a little of what I have been confronting. I wanted the current administration to know a little of what has been going on.

I was not sure whether I was merely being forgotten about or whether any building was being done at working out anything professionally with me. I thought I would make this report as something appropriate for me to do and to add to an understanding of events through the summer and continuing. I would then look for

a response or see I do not receive a response, and the same is so with something being worked out professionally with me. Either way, I will stay on track and remain successful, although I would prefer me being dealt with and something being worked out professionally with me. A main concern I have is that if I keep not being dealt with in times I truly should be dealt with and by people who should deal with me, then exactly when am I going to be dealt with and by what people, if any people ever.

### **National Issues**

With these areas involving me being included, situations are affected, are different, and reach different results than without the inclusions. If considering national level issues, the differences could be very substantial and serious. The better and most appropriate situation is with the inclusions. When taking on any national level issue, there would not be wisdom in leaving out many important facts and resources. The national issues would all be better off with the inclusions of these areas I have been mentioning about.

I would like to work on national issues. I could say here about various national issues that have been active, but everyone knows of the national issues, and I do not want to just waste time or make statements in areas outside of my job bounds. I am just expressing here that if I had the job, I would do it and would be the best at it, including in terms of providing consultation, preservation, and actions concerning any and all national issues. This type of work is really what I should be doing, and much around involving the national issues needs my additions. A professional position that includes and is on the level of working with the national issues is appropriate to be worked out with me and probably more so than with anyone else in this entire country or on Earth.

### **Conclusion**

I am presently continuing as I have been and as expressed in this report. I could be and should be presented with a professional position package of an offer made to me in regard of my credentials and rights. I touched on these areas in this report. I kept the report inclusive and more than usual but also brief and concise. This report was also for the purposes of backing the appropriateness of my questioning of whether a professional position would be offered to me and better enabling the opportunity presentation to be done.

Thank you for your time and attention given to this report.

Subject: Report on the season

+++++

### **Ongoing Situation Remaining at Present**

The question is whether I will be dealt with or not. Will I receive an opportunity appropriate for me and worthy of, in recognition of, and in honor of my high-end credentials, such as 30 years of relevant experience and being the recipient of a historical honor (referred to as God's Miracle Cross) relevant to the United States? The time involved here in the current era is since before the 2017 summer, as can be seen in the time stamps, and I have not been dealt with yet. I remained successful through all that time. Nothing has been presented to me yet; nothing was worked out with me yet; no relevant communication has been made to me yet, and no money has been paid to me yet. There has only been the one Director of Presidential Personnel letter acknowledging my interest in a professional position and inviting me to communicate further by means of the email line provided, which I did follow-up on.

If you have anything to present to me, please do present it, and I will review it and respond accordingly and in an efficient manner.

Thank you, Merry Christmas, and happy holidays,

Joseph Mallon

**Questioning in January 2018**

Hello John DeStefano,

I have a few questions and considerations for the Trump administration. Did you establish my department? Are you going to turn over my department to me sometime soon?

Remember, I am not only an advanced professional person, but also, I am a dignitary who is a historic and very important person, and I am someone who is supposed to be rewarded and honored on United States levels.

The following includes some of my communication from distant past times. The point is to let you know of the relevant longevity already involved. The time stamps show when the material was originally communicated. I included the material here and also attached a PDF document.

Please do communicate back to me with anything pertinent you have to offer.

Joseph Mallon

### Relevant Communication from Past Years

#### August 30, 2015 Email Messages to the Republican Party (RNC)

Republican Party (RNC),

I communicated the following email message a little while back to Donald Trump through one of his Internet servers. I did not receive a response, though. Maybe, the message was overlooked for some reason. I am sending a copy of the message to over here so that it could, perhaps, be passed on to where it should go to get successfully worked on. Being that the matters are important, you can be assured that you have hereby been informed.

I have presented the relevant information. If dealt with and I receive a relevant response, I will efficiently work with it and follow-up accordingly. If I do not receive a response, I will not communicate again in this direction any time soon.

The following is the message I recently communicated. I will not communicate again in this direction of the Republican Party (RNC) unless I receive relevant communication for me to follow-up on.

Thank you for your attention,

Joseph Mallon, DBA-c

And

Donald Trump (Concerning Trump and U.S. Presidential campaigning),  
I sent this message over to the Republican Party (RNC) because of its importance and to do something additional for in case the message was mishandled in some way. I am presently just informing you that I passed this message on to the Republican Party (RNC) after more than a month passed by without me receiving a response.

Thank you,

Joseph Mallon, DBA (Doctoral Candidate)

Dated: 08/30/2015

Republican Party (RNC):

Maybe you should deal with the matters involved. Communication from here to there has certainly continued through a long amount of time. I will not think too much of anything in this direction until I receive relevant communication back and something involved is actually worked out. I repeat my emphasis here, and in current form.

I will again turn my attention in your direction if and when something relevant is presented to me. You will never truly be successful without including me and my resources, and you will never include me or my resources without presenting anything to me and working something relevant out with me concerning the United States and its government, its people, and its professional offices.

Joseph Mallon, DBA-c, FLMI, FFSI

Donald Trump (Republican Party – RNC – concerning Trump and U.S. Presidential campaigning),

Included in this material is one of my first letters and one of my latest letters. The first letter goes back to the beginning of May 2011, and the other letter goes back to mid-October 2011. I noticed some additional activity recently. I still express I could add my work in here but would have to receive some kind of realistic offer and opportunity to do so, and I would absolutely not have any interest at all otherwise. I remain busy currently and will continue remaining busy and including finishing up the last course in the business doctoral program I am in to receive a doctorate in business.

I will just say that recently I noted some positive activity. I already communicated about my professional merits, and they remain active in the present times. I can work with anything involved here, whether as a Republican, Independent, or something else. If having any interest in working progressively and successfully with me concerning this country and its government, communication can reach me at my contact location provided.

Thank you,

Joseph Mallon, DBA(Doctoral Candidate)

Joseph Mallon, MBA

12/25/11 - (This message was communicated to the Republican National Committee and the Trump Organization.)

Republican National Committee,

You people here of the Republican Party know you did not communicate back to me yet. You did not work anything out with me at all yet. The organization here continues without dealing with the true people to deal with and who have years of relevancy concerning all involved here. About 99% of the people involved with this organization will not have a successful situation concerning this organization because you 1% of the people involved did not achieve working out the issues, and in fact, you did not show good faith effort when you did not communicate relevantly, present legitimate opportunities, or confer the rewards due.

I do not have time or interest to have my time needlessly taken up. If you intend to go in right and successful ways, you have to do some accurate work for real and through a consistent amount of time. The necessary work requires accomplishing because that is the only way to possibly take care of the details involved.

You know who I am, and you have my contact information. You will not easily deal with me without doing the appropriate work and making enough good faith efforts. I have observed your lack of progress and high degree of division and uncertainty. You are far from settled with what and who you are working with through the next months. You should start communicating relevantly, especially with me, and you should work some professional agreement out with me for the next months and seasons. Otherwise, you will not deal with me, and I will not deal much with you.

You can communicate back to me, if you communicate relevantly with some kind of real offer made to me. I require contact information that is active and functional, and I require ongoing communication for express purposes of working out this situation progressively with me. If you communicate back to me, I will respond, and if you do not communicate back to me, I will only say what I have stated here.

I continue doing well, but I presently remain not dealt with well on the career levels involved. I have an MBA degree, and I continue working on my doctorate in business. I am advancing my dissertation well, and I have now advanced to a next level in the doctoral program, the level of doctoral candidate. I continue having active director level applications with the United States (Federal) government for professional positions applicable for an advanced executive officer level. I will not further say my merits because this organization should already know of them from my previous communication through the past years, but in addition, if wanting any further information concerning my merits justifying this organization dealing with me in terms of honor, just ask in communication to me, and I will appropriately respond and follow-up accordingly.

You can tell me if you want to work with me concerning the United States Presidency or the United States Vice Presidency during the next months, seasons, and years. If you want to, you will have to communicate to me relevantly, as I previously expressed. I will not say anything additional here or in other directions, and I will have no interest or time for anything here if I am not dealt with concerning the honors involved with my merits.

If you, or this organization, have intent to communicate to me, I am reachable only at the contact information I provided.

Thank you,

Joseph Mallon, DBA Doctoral Candidate

**Joseph Mallon**  
Philadelphia, Pennsylvania, U.S.A.  
July 2006

10-16-11

Donald Trump (Republican Party – RNC – concerning Trump and U.S. Presidential campaigning),

I saw nothing in the media relevant through the past week. I myself have still not received any communication in response to my previous messages. I still would have to receive relevant communication to work anything out with me. I presently continue as previously indicated and will keep going in this way to July 15<sup>th</sup> when I have either received relevant communication back or not. Beyond this, whether I receive communication back or not, I proceed through to into next year, and the only difference involves whether I work on communication received or work on not receiving any relevant communication.

I reviewed additional material through the past week, but I will not report on that here because I have not received word of working with me yet, if at all. Of course, if nothing results as worked out with me, I remain separate and uninvolved with any of your organization's endeavors. You should think about the situation, though, because much potential includes within the bounds of my previously communicated presentations. Perhaps, you had a chance to further review the state of the country through the past week. You may have picked up on a little more of the situations actively continuing in and concerning the United States.

I still presently need to know your response to my communication. I will see one way or another eventually, but for you to work anything out with me specifically, you have to communicate directly to me by some reasonable communication line I have open, such as email – [jmallon@comcast.net](mailto:jmallon@comcast.net) – or telephone – 215-279-8580. You could gain some ground if communicating back to me and settling the continuance through the next year, and plus, a progressive situation would result instantly and go through more than the next year. Of course, work and effort will remain involved, but with success achieved, optimal potential would

manifest. Through the past week, you have not stood out in the media, and I do not presently know if you intend to continue seeking the United States Presidency in 2012, but if you do and have any kind of offer to make to me, you can reach me at my stated open communication lines.

01/10/2018

## February 2018

Hello John DeStefano (and the Trump administration),

Because the *Philadelphia Eagles* professional football team won the Super Bowl, I decided to send you another message. This current administration did have some involvement with professional football in the recent past. My hometown is Philadelphia, and the Eagles are my hometown football team. As you know, I have had material here with this administration since before the 2017 summer. I would like to see this professional league level in these directions, so thus, I thought that now was a good time to further question about that and make a few plays in your directions again. I am just throwing the ball your way again.

I am interested in knowing if we are on the same team. I want to know what team I am on. I would like to know what team you and this administration are on. I do not want to just think things about any team and then turn and look and see nothing that I should be seeing with the team. I want to be able to make my good plays and know that everyone else on the team are also making their good plays that keep the team a winning team and even a champion team. I would like to see the good plays treated as being good plays and highlighted and replayed as good plays.

The current situation continues as the past season illustrations show. The best gameplay possible continues. Scoring more and winning more will be done, and the reciprocal will continue being looked for and anticipated.

Joseph Mallon - Joseph Mallon, DBA-c, FLMI, FFSI -/\-

What about the American dreamers? What about the American children?

There are more than 22,000 American children in New Jersey.

What about all the Americans? Should all these Americans, and American children included, be called DREAMERS?

What about the American companies? What are the American companies doing, and what do those of the American companies truly have to say?

Again, what about the American dreamers?

Remember my book from a long time ago, still not dealt with yet but certainly still extensively requiring.

# Dream BOOK

From The Book Of Dreams

*God's Miracle Cross with a Heart and Angel Wings*

Joseph Mallon

According to many reports, direct and indirect, Federal tax cuts are not being divided evenly among the business people, businesses, or U.S. Citizens, whether this means this year or over the next five years. In addition, tax cuts show for citizens as a few percentage points less, such as down from 25% to 22% (three percent less which equates to the cost of living for one year), and companies tax rates went down from 35% to 21% less (14% less, more than 4 times as much as the tax decrease percentage for American citizens, per year).

02/15/2018

////////////////////

This communication is important and says about important matters.

You can take 500 of your employees who are United States government agents, officials, or representatives and put them in the department involved here. You pay the department its money, and out of that money, you can pay the employees-the U.S. agents, officials, and representatives. Also, remember to set my money aside to pay me

my modest pay of currently \$110,000 yearly, but also to be fair with the practices of this level of professionals, my yearly pay has to increase by the 3% cost of living increase, by an extra 7% for doing a good job, and an additional 4% for a bonus, which is  $3\% + 7\% + 4\% = 14\%$  and  $[(\$110,000 \times 14\%) + \$110,000] = \$125,400$ . Thus, my yearly pay for 2018 is \$125,400.

Please do take these areas seriously. Consider the student loans situation in this country, nationally amounting to more than 1 trillion dollars. Time of decades is already involved. The student loans situation in this country has not been taken care of yet. Even I myself am still saying about the **Student Loans Relinquishment (Discharge) Honor** I am supposed to receive based on my more than **30 years** of work on a societally significant worthy cause concerning the United States and humanity.

United States student loan debt totals more than \$1.3 trillion in 2017 and in 2018 so far \$1.48 trillion, according to latest Internet information available.

In addition, while these issues are not yet worked out here, take a look at what some other organizations are doing in the time passing by. They are working out agreements among themselves, and they are acting on them to effectually advance the situations influenced in accord with the endeavors. What about you of the United States Government?

## March 2018

Hello John DeStefano (and the Trump administration),

I presented material through the second half of last year of 2017. I said about working out my professional position of director. While I presented many possibilities and that are still remaining, an adequacy was not worked out with me directly by the end of the year of 2017. I received no additional communication back, and I did specifically express the situation as being with me receiving only the one letter I referred to in my communication and continued following up on. This situation remains as the current situation presently continuing.

Going into this year of 2018, I continued confronting everything and with nothing additional added, although I would have preferred something added because I wanted a better situation, one that had higher levels involved.

The academic situation was described as one where I finished the doctoral program on numerous occasions and was not let to fully finish successfully. I did more and more to finish. I questioned here about there being any possibilities of opportunities in any relevant direction, such as at other universities or being worked with directly concerning an already very advanced and successful dissertation and work done through and beyond a doctoral program. I was not presented with anything additional, so I did take on even more to continue with my good faith effort and to remain successful on my part. I am presently further advanced in this way and am remaining successful.

Another aspect of the academic area was that I mentioned about a type of a legal action taken. I further reported that the companies involved with the legal type of action concerning online universities were all wiped out by some hasty legal action taken by a U.S. Agency going to a U.S. Court and obtaining some type of order to implement action against those companies. I also said that this occurrence should be looked at on the right levels. In addition, I did not previously know anything more was active, but I recently found out, that the work through the U.S. Department of Education was truly being done and that the

materials were reported to the correct U.S. educational agency and remain there presently. I was recently told that there should be some results on this matter by in August 2018.

With my professional position here not being adequately secured yet, I could not give any notice in the direction of where I have been working. As previously mentioned in that direction, the company partnered with another company that is an international company with significant business operations throughout the United States. The progression of this international alliance continues and will remain continuing through the next months.

In the direction of the relational letter, there is no further development as of yet. The situation is with the time still going by in the terms that the relational letter specifies. I have not been communicated to in any relevant way at all yet. Nothing has been worked out mutually with me. Nothing has been presented to me, and in no way have I been dealt with at all yet. Everything remains requiring and as stated in the letter. In addition, by the way, I require relevant communication directly with me, and that I, and the matters involved, be properly dealt with immediately and continuing through a reasonable amount of time.

Concerning all the extra ordinary aspects and historic elements involved with my work, they remain active, successful, and estimable. They were communicated about to here adequately because of the level of the professional position involved and because of the United States having a degree of primary involvement. All remains as it has been in these directions. Advancements will be made in due times and will be reported accordingly.

Lastly, in my previous communication, I mentioned about the Philadelphia Eagles professional football team winning the Super Bowl because it was relevant to the involvement of the City of Philadelphia and to the time when I communicated. I did not do anything more in these directions because it was not appropriate for me to, and with the times of such celebrating, I did not want to add in extra seriousness to the times. The additional emphasis that has to be stayed aware of is that these areas that I have been communicating about include the City of Philadelphia but still have not been handled or dealt with by the City of Philadelphia even though the Eagles won the Super Bowl. These other areas involving Philadelphia have to be handled successfully and obviously cannot be when only the Philadelphia Eagles' players are among the few paid well in or from Philadelphia.

In addition, Philadelphia will always remain a part of Pennsylvania—the state of Pennsylvania, and Pennsylvania is still remaining as a part of the United States. That United States is still the United States, and as reported, these areas are not settled yet and remain requiring presently and through the next months until advancements are made. I would like to see an adequacy by August 2018. Even before August 2018 in these other directions involving the United States, such as in terms of securing my professional position of director with the United States government, I would like to receive at least a letter informing me of a positive, mutual, and successful situation that I can count on, work with, and give notice of on my levels.

03/12/2018

## April 2018

Hello John DeStefano (and the Trump administration),

I will address one of the issues I have been communicating about because this issue is important concerning this country and all its interests. One of the documents I sent I referred to as a relational letter. As would be able to be seen, the letter was masked. The specific identities were not stated there, but of course, the identities are real and of real people, and the letter is real. The letter portrays the real situation.

Consider the letter a little bit. The woman involved has not yet communicated—responded. Look at the time involved. That time stated in the letter is the actual time of that letter and all involved with it. In all that time, the woman involved has not responded. She has not communicated at all. Whether she even knows it or not, she has not even communicated at all yet.

I will keep the letter and the emphasis masked for the time being. However, I will express that the woman involved was supposed to deal with the matters involved and long before the present times. She had a marriage she was supposed to deal with and, of course, including involving the person additional to herself. She left, or was caused to leave, many years go by like this, and now the masked relational letter still remains saying a little about what is involved.

The letter is still active and actively communicated in the woman's direction. Although there is a lot she does not know because of not communicating and adequately functioning mutually, she knows what and who is involved, and she is well informed. She knows she does not have the matters dealt with, and she knows that she still has to communicate and has not done that yet. She either knows all that, or something is causing her to not know all that or not know enough of that.

The woman said about in the letter should sign the letter and send it back. She should then continue following up accordingly as best as she can. She should show good intent to work out the

situation as best as possible and that she is making good faith efforts. She will have to deal with the time involved and including in terms of not wasting any more time, and she will have to be devoted and diligent. Until she proceeds adequately in these directions, the time on the relational letter keeps accumulating, and the situation, including the marriage, will justly remain masked.

Joseph Mallon - Joseph Mallon, DBA-c, FLMI, FFSI -/\-

04/04/2018

---

***Fair Warning:*** *In addition to this letter being communicated to the White House administration, which is a part of the United States Government, versions of this letter have been communicated steadily to the particular person involved, and such communicating remains active currently and until settlement in some mutual way.*

Masked Male Name, ABC (Masked Advanced Credentials)

1111 Masked Address Rd., Masked City, DC 99999, U.S.A.

Telephone number - email address

Date: April 4, 2018

April 2012 to April 2018 = six years

Look at the time of this communication to you—April 9, 2012 through to December 25, 2016 – Christmas Day to January 12 to June 10, 2017 and to April 4, 2018. You certainly had your chances. You apparently have nothing to say about anything involved. I say as I have expressed, but also, I am fed up with not being adequately or properly dealt with in your directions. You should have been doing your part along the way.

Negotiation with you involving me is that you have to deal with all involved with this letter and the time you took to deal with this letter.

Why don't you answer?

I request that you respond to me.

You have not dealt with me or anything involved yet.

Why not...?

You won't get in my door if you don't deal with our marriage.

I want my wife immediately!

I would like to see some caring on your part.

I need my wife.

When are you going to deal with me and the matters involved?

I question everything in your directions at this point.

Why are you not even making any good faith effort? You need to explain to me through an adequate amount of time and away from those disrespectful people in contrast, if you are ever going to do that. You either deal with me, or you are not dealing with me. Everything is whatever it is accordingly. I made my statements and included my contact information in reasonable forms.

Masked Female Name, [redacted] (I request that you respond to me, and stop treating me like some stranger in a crowd.)

I request for my wife, you Masked Female Name, who you were and are supposed to be, to deal with me. Who I am has already undergone presentation in numerous ways through years. I have gone through long enough to expect a sufficiency according to my perspectives. I have valid and worthy credentials. I am well proven.

I will review and report on what I see, and I will follow-up on everything accordingly. The situation of our marriage has to be worked through and worked out, but also, through an excessive amount of time, I have not seen a sufficiency on your part. I am very concerned and displeased. I am saying about something, and there is something to it, but of course, I have to be dealt with. I feel that too long has passed by. The time issue also has to be addressed. A main requiring aspect is that I have to be dealt with concerning everything involved.

I request for you to immediately and continuing deal with me and communicate with me. You have to telephone me and email me immediately and continuing. I request your functional telephone number so that I can call you when you do not call me. I am looking for your email and telephone communication back to me.

1111 Masked Address Rd., Masked City, DC 99999, U.S.A.

You now have taken up another four (six, seven, 8, 9, 10, 11...) seasons without reasonably dealing with the issues or people involved, including myself. You had concerts through the summer seasons of 2012, 2013, 2014, and 2015 (2016) and still worked nothing out. I am the one who already has a graduate degree and am a doctoral candidate in my professional field, and I should have already been rewarded

for that. I am who has an excellent dissertation, which is absolutely nothing less and should not be treated as less. Such mistreatment already caused further difficulties that continue requiring as the dissertation already says. Concerning my merits and areas of activity and involvement, I am the one to be rewarded and honored concerning many aspects and including the present era doctoral work I did through the program, formally exhibiting propriety of me being a doctor in the professional field. Thus also, I am the one for you to regard and deal with when I make an emphasis in your direction.

What do you have to present to me? I repeat my emphasis to you and request you to communicate with me.

Masked Male Name, ABC 02-11-2015 to 04/04/2018

04/04/2018

## May 2018

Hello John DeStefano (and the Trump administration),

The situation continues in ways previously described. April 2018 was a difficult month. There was everything continuing in forms with me still not dealt with yet here or concerning anything involved. The time passage was already substantial since years ago and up to and through the present times. As best as possible continued to be done concerning everything, though. True progress remains still possible and requiring.

My mother passed away last month at an elderly age due to natural causes. The mourning will continue through a substantial amount of time further. The most difficult part here is that my mother did not get a chance to see her son dealt with well and doing well because of being dealt with concerning the significant aspects involving her son and accordingly concerning herself. The times involved with me being dealt with in the rewarding and honoring ways due me and necessary to deal with me were way too long and far longer than they should have been for any reasonable person.

I continued doing well on the levels that I was working on and kept on diligently working. The previously mentioned company transition went through well and remains successful. The continued success was helpful for handling the active situation. Advancing and staying successful will continue on my levels concerning all involved while I work with the associated company.

The educational situation continues with successes and deficiencies. The deficiencies do not belong around at all but still excessively are around, and the worst part about it is that such deficiencies are still actively happening. I did not used to say about these areas, but the situation of the past five years of me graduating from the doctoral program and not being let to graduate has me definitely saying things as I have been in this direction of education (5 years of the program and 5 years graduating from the program, which equals 10 years and with the time still accumulating). I will continue doing well with what I do and doing the

good things I do, and I will also be continuing to watch in the U.S. agency directions previously described.

My division continues as previously described, too. As you should know by now, I am not, or my division is not, adequately dealt with or rewarded yet. There is no other division like this one and no other division with rights beyond or instead of this one. As previously said, this division is constitutionally grounded and comes from many years ago. These areas went into Reagan's times and remained requiring since then to the present and onward until whenever an adequacy of dealing with these areas results. This division will go through the next years into 2020 and will continue to 2024 and beyond. No other area is the same or has rights without the inclusions of this area. The division I refer to here is, of course, the division that I overwatch with my directorship. I do also hope, and encourage, that the Trump administration is advancing with this division.

I still have not seen or heard from the woman who was my wife and left me without a wife. There is still no real trace of her or sign of her. She has no real or functional communication active. There has still been absolutely no real communication yet. She is still nowhere around or anywhere in sight. Additionally, the time involved with these conditions is substantially too long.

I still remain open to relevant presentations of offers and opportunities being made to me. I can be communicated to at any time wanting to do so, and I will respond efficiently. I consider everything here involving dealing with the matters presented to be within the bounds of the Trump administration, although my division is independent and connected with by the Trump administration achieving success.

Joseph Mallon - Joseph Mallon, DBA-c, FLMI, FFSI -/\-

05/05/2018

## June 2018

Hello John DeStefano (and the Trump administration),

I am sending you another email, as I have done through the past year, June 2017 to June 2018. Through the past year, I expressed about some substantial aspects involved and that justify working with me as having a director position with the United States government and including most especially with the current administration, the Trump administration. I absolutely did not say everything about everything, and I deliberately held back on very much because of not wanting to overdo anything or accumulate too much. I made an intentional effort to include the true background and credentials and to specifically express about the societally significant aspects that most often in these times do not get mentioned or included. You, and the current White House administration, should think about my communication because of its long-lasting importance, and if you would like to work out something with me, you can and should make an adequate presentation to me for me to review and follow-up with as I determine appropriate.

As you can understand by now, I am a historic person, a dignitary, and a very important person in and of the United States, and a long time ago, I did well with school and education and put the significant context into intellectual forms. I eventually authored numerous books while overcoming all difficulties and remaining successful through all the times. I went into law school and still remained successful then presently and continuing as I received no support for

finishing law school even though I made excellent law cases in the United States Courts from the District Court to the Supreme Court of the United States. I remained successful in business while the law was not worked on enough to get law school worked out. Because law school was not being advanced, I went on to obtain an MBA (Master of Business Administration) degree. My first published book was done at the same time as I received my MBA degree. Because of myself already having so much going positively and such a substantial background that already included books authored and an MBA degree, I went into the doctoral program. I did well through the doctoral program and achieved an A grade level GPA. I finished the standard doctoral program in 2012 with an A grade level GPA.

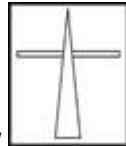

I have been from then in 2012 to now in 2018 graduating from the doctoral program, doing well in the doctoral program, and not being let to finish the doctoral program. The not being let to finish the doctoral program is in no way right, constructive, mutual, beneficial, ethical, or wise at all. I made many reports about this state of education and including to the university officers and here to parties in Washington, D.C., such as the U.S. Department of Education and the White House administration. Although the university officers mainly just rationalized the university, I still look to and stress the importance and necessity of the Washington, D.C. officials reaching right results concerning the state of education in the United States.

I am also open to some recommendations here. If you can present any opportunities to me, I would like that and would review the opportunities and respond accordingly in a timely manner. If you can get some attorneys working in these areas on my behalf and under my authority, that would be good because I would like compensations and other rightful actions taken. I could make a few such law cases in these days, and this educational university case would be one of them. Any settlement reached would be goodwill to be any less of a monetary amount of a billion dollars.

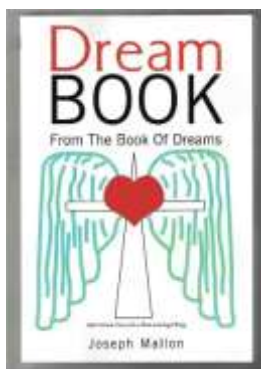

In the direction of the current doctoral program status, I want the doctorate I already earned and deserved years ago. If this administration has any offers to make to me, I would like to know of them. I mean that if you know of any universities that would make an offer to me to finish up the already completed doctoral program by doing the university doctoral level work needed, please tell them to make the offers to me. If this administration would rather order or strongly influence the university that has been involved to just do its job and get its work done on its levels, that would be alright, too. The university involved could just be secured at going right ways of completing its end of my dissertation and the doctoral program, and my doctorate earned above and beyond would be issued to me. Plus, I still want the university to pay significant compensations of a realistic amount I would by good will settle for reasonably.

In the meantime, I still do very well with education, academics, intelligence, and wisdom. I am still counting on you, and all who are with this current administration, to do the same, and I am recommending that you advance by connecting with me and presenting some of your additions to the situations described and including the state of education in the United States.

I am the one who is the *discoverer* of an authentic miracle cross, which has been

referred to as *God's Miracle Cross* through the past quarter-century. I previously mentioned of this cross. After about a year of working with this wondrous cross, I knew the extraordinariness of it. The present situation of me communicating to here concerning the directorship position involved has continued through the past year or so now, and you should see by now at least some glimpses of the extraordinariness involved. Nothing in or of the United States, or anywhere on Earth, is more than the historic reality of *God's Miracle Cross* -/\-.

Consider some aspects of this miraculous cross. The discovery was made in June 1981. I did primary work with this cross through the following 7 years. I then had the design of this miracle cross patented, and I eventually made a design copyright, too. The original miracle cross was an authentic miracle, and being a miracle means that it was something beyond the abilities of humankind. This miracle specifically included humankind, although it went far beyond humankind at the same time. This miracle cross was also beyond the abilities of the United States alone, and all involved has always remained beyond the abilities of only the United States through the past more than a quarter-century.

This miracle cross was discovered in the city of Philadelphia in the state of Pennsylvania in this country, USA. I myself am an American and have all the rights and privileges of an American. While this miracle cross and its reality,

including involving me and my honorable status, is not limited to the United States, all here is most involving the United States, and the United States is supposed to deal with it.

Just think about this miracle cross a little bit. This miraculous wonder is from a Being who is a deity and is not on the Earth. He—the deity—made this miraculous cross from a far distance from the Earth and made it perfectly on Earth. This amazing work was made through many years—Earth years—and was set in place for me to eventually discover. Just think about how extraordinary that is and truly.

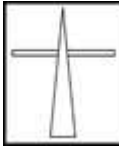

The miraculous cross, referred to as *God's Miracle Cross*, was a masterpiece. An extreme mastery level was exhibited with the finished work that was the actual *God's Miracle Cross*. A more than genius level was displayed with the wisdom, knowledge, and ability that went into the completed work that was the authentic miracle cross. Another notable quality shown with the placing and maintaining of the original *God's Miracle Cross* was devoted caring. This devoted caring was from a Being far away from the Earth and who possessed such powers and abilities on Earth as to be able to create this miracle cross on Earth.

Of course, the United States was the chosen country for this divine manifestation, which was *God's Miracle Cross*. All involved with the United States

was known and understood. The growth and development of the United States was known, and all the history that went into the United States was known. All the good qualities of the United States were known, and all the potential of the United States was known. All the serious aspects and difficulties of the United States were known, too, but that was also why there was so much positive and good included in the understanding and wisdom and in the physical manifestations, such as *God's Miracle Cross*.

Now more than a quarter-century is involved with *God's Miracle Cross* -/\- relevant to the United States. More than a year of present-era communication has been made by me to the White House. This month is June, which was the month that the original *God's Miracle Cross* was discovered. I do hope that you here of this current administration have done some discovering, too, and including of *God's*

*Miracle Cross.* 

As I have also mentioned in other places, there was a woman involving me and involving this miracle cross. This woman was supposed to deal with this cross and me, and she was supposed to be my wife. She was abundantly communicated to but excessively did not or was caused to not do her part. She was in a position of being able to deal with this cross and me on her levels, but instead, she did not do her part involving this cross or me and left me without my wife through those years.

These areas still have to be worked through in my interests and under my authority, but with the excessive time involved, there is no certainty that this particular woman will be able to deal with me or *God's Miracle Cross*.

With *God's Miracle Cross* established as a historic and intricately sophisticated artifact and phenomenon in the United States and on Earth through the past more than 25 years, it is about time for the matters involved to be worked out. This area of the United States and concerning the world is the neglected area requiring attention, effort, and support. This area is what affects all other areas of the country and the world. Nothing is truly safe or can be trusted if leaving so much out and not included or taken care of adequately. Now is the time for *God's Miracle Cross* to be advanced at being dealt with progressively on successful levels of the United States and the world.

The current administration has been considering to sponsor the starting of a space military division, but no question exists as to the valid controversy of such a thing, and the only way of true validity is to sponsor my division of the United States government. The United States people of history do not want and never did want a ruffian United States, and the people of the history of the world do not want ruffian outer space proliferation. Establishing a Federal agency without true inclusion of relevant citizens and professionals was never sufficient in itself, and more like that will be the same, so thus, the American strength can only be

advanced appropriately within the bounds of the United States division I mentioned about. Outer space and the galaxy and universe far exceed rule by bullying, arrogant, usurped, and unwise force. The newly officialized division of the United States must necessarily, worthily, and righteously be the one that is backing and backed by *God's Miracle Cross*.

Offers and opportunities can be provided to me at any time in the continuance of the present months. I will review anything presented and efficiently respond accordingly. My official communication lines are specified as the same as a year ago when the letter from the White House reached me. I welcome any relevant presentation made to me from the Trump administration at the White House and involving the United States governance.

Joseph Mallon - Joseph Mallon, MBA, DBA-c, FLMI, FFSI -/\-

06/05/2018

## July 2018

Hello John DeStefano (and the Trump administration),

Through the past more than a year now, I said about the important division of this country, the United States, and its government, that is requiring to be officially dealt with and advanced in rewarding and honoring ways due. I said about the appropriateness of my director level position with the United States and which ranks on the level of SES (Senior Executive Services) executive or equivalent. I expressed about an area that has a solid quarter-century foundation and worthiness of being constructively worked with and advanced on appropriate levels. I further declared and exhibited the local to state to national United States functionality and expertise, the international and global accuracy, influence, and wisdom, and the decades-long maintained celestial linkage over vast expanse and back to the included planet Earth. With rights to all privileges of a natural-born American and a natural-born Earthling, and not someone merely from elsewhere, I exhibit my rights, expression, and incontestability concerning the United States and express the necessity of working out the professional aspects involved.

With all these matters involved and requiring through the years and not yet worked out, nothing else can appropriately be done with any kind of degree of propriety, sustainability, or true success. The inclusion of these mentioned areas requires in order for any chance of achieving any true progress or having any true worthiness. The division I mentioned about as requiring for a quarter-century is not just militaristic and cannot and will not be limited to the military or a military perspective. Perhaps, this division I mentioned about has to have the United States military, including any space military,

officially recognized in its proper place within the United States government division I mentioned about. The United States from local to state and national levels, to international and global levels, and to intergalactic and universal levels has to be the independent, peaceful, sovereign, noble, honorable, and blessed nation it is supposed to be and has rights to be, along with its citizenry and leadership.

I request that a committee be formed to steadfastly and loyally work out these areas progressively through the immediately continuing times. The mode will range from top secret to fully overt. I will observe and evaluate frequently, and I will take action and notify accordingly. The areas of this freshly officialized United States division I mentioned about have to be filled in and including to points where I can be content and be functioning as I know I should. You, here of this current White House administration should be with me so that we can advance, as we should, and without needing to increase being extra critical or skeptical.

Lastly, I will leave some open space here for any key signatures or seals, fitting for the Declaration of Independence and the Independence Day time of the year. Each signature or seal stands for being on-board accordingly with the cause expressed throughout this document and the many years involved. Before any signature or seal, or when not seeing one, the signatures of souls attest and provide the foundation for other declarative signatures or seals.

Thank you for your attention, Joseph Mallon - Joseph Mallon, MBA, DBA-c, FLMI,

FFSI -/\-

07-04-2018

## August 2018

Hello John DeStefano (and the Trump administration),

I still presently remain following up on the one letter that I did previously receive from here. No additional communication from the Trump administration has been made to me yet. Nothing beyond the one letter from here has been worked out with me or presented to me. The continuance has remained like this for more than a year. There is either something additional, or there is not. I continue evaluating the situation and outlook, and I continue planning and directing accordingly.

I myself remained very successful. I kept diligently working and working professionally. I kept a check on the academic situation in and of this country, and I kept secure, steady, and guided many social areas relevant. You of this Trump administration should adequately communicate further with me, and work out something adequate with me.

There is nothing more involved with this country, U.S.A., than the areas I communicated about. If not reasonably regarding those areas, or myself involving them, good work is not being done involving America or its government or people. Decades of time involving this country and its people are directly involved. Success is achieved by dealing well with the areas presented and with myself, too, and that dealing well with the areas means accordingly concerning the circumstances and levels. The other aspect significantly involved here is that predominantly these areas are not dealt with at all yet, and that is always a part of the situation and considerations through these times. The best that can be done is to adequately communicate relevantly to me and endeavor to work out something successful with me.

I am very easy to deal with, but also at the same time, I am not easy to deal with. Right things have to be done; good faith effort has to be made, and proper intent has to be maintained, and you will be able to deal with me, but otherwise, you will not be able to successfully deal with me. Remember that I am the discoverer of God's Miracle Cross, which in its original form was an authentic miracle, and there is certainly a significant

characteristic and profession reality involved with that. I worked through the past decades in this way, and I expect equal or greater rank and authority as compared to any United States official. The level of an advanced rank and authority is necessary because of being right and because there is much work that has to be done and many advancements that have to be made. Additionally, there has been and will be much time involved.

One of the areas I previously mentioned about was the academic situation. In brief, I eventually went into a graduate program and obtained an MBA (Master of Business Administration) degree, and I then went on into a doctoral program for a DBA (Doctor of Business Administration) doctorate. I did well through the doctoral program, achieved an A grade level GPA, and had an excellent A grade level dissertation by in 2012. I finished the standard doctoral program like that in 2012, but the university caused me to remain only supposed to be graduating through the next more than 5 years. There was absolutely no reason or justification for that. I necessarily and appropriately made numerous complaints. Up to recently, these same occurrences continued, so I had to make another dispute internally with the university, and that dispute remained continuing unsettled through the whole summer so far. At the same time, I already had my complaint with the U.S. Department of Education and where the complaint had been through the past more than a year. This situation is as I previously communicated in the correspondence from me.

The time has come for these complaints to be settled. The issue still is, though, as to whether these complaints will truly be settled and especially to mutual contentment. There should be such a mutually adequate settling, but there has to be in order for there to be. You should contribute to an emphasis that these issues have to be settled fairly among the parties involved and not just in a one-sided way that leaves the other parties out and not settled at all.

These academic areas are important to many people of this country. Student loans are a key item involved. Student loans are one of the largest debts in this country. Student loans are among the biggest debts many people have in this country. How the U.S. Department of Education deals with this academic area and the student loans involved affects millions of people throughout the United States. A vast amount of wealth is

involved. This country's student loan situation will not be settled immediately, but it would be going in a right way if the U.S. Department of Education secures the student loan situation in ways of eliminating the excess of the student loan debt from where it does not belong.

There is much more to say about here, but I will hold back on doing that because enough has already been said. The main aspects involved are what has been involved continued through more than the past year, parties involved were communicated to and well informed, parties involved have not yet even adequately communicated, made presentations, or worked anything out on their levels, and I upheld everything and remained very successful through all that time of more than the past year to the present and continuing. The time has come for the disputes to be settled, the honor and authority to be where is right, and for there to be an adequacy of cooperation and mutuality among the parties involved. Because of this entire situation going on in the present era through the past more than a year, truly relevant progressive situations have to continue through a substantial amount of time.

I remain actively working constructively on all involved. I will review and respond accordingly to anything presented to me and as I continue maintaining my policies, practices, and merits.
